Under Secretary to
Government

Serial
No

Letter no 87-1588 of 5-5-32
from the P.D. Mysore is
requesting that the loans may be sanctioned
by Govt. early to enable the two works
(Construction of Sheep Slaughter House and
of Nirmal Nails to the West of Mysore market)
being started before the close of the financial
year

1 The President has provided a
statement showing the names of urgent works
to be financed by loans to be obtained from
Govt. during the year 1932-33. Schemes for
items 3 & 4 in the statement are stated to
be ready, and it is stated that they will
be submitted to Govt. if the loan is granted
early. Estimates for items 5 and 6 are
stated to have been submitted to the Chief
Eng. for scrutiny, and detailed estimates for item
6 are stated to have been called for from
the Govt. of Public Health.

2 As regards items 1 & 2, the President
states that they are to be taken up immediately
after the loan applied for is sanctioned. It
is not known when the President has applied
for the grant of loans for these two works.
These were files (no 68-28-7 and no 68-28-11)
relating to the sanction of these works and
put up for reference. There is no reference in
these files regarding the grant of loans, referred to

4) The President may perhaps be asked to estimate when he made reference to the amount subject of loans for the two works. Sub

12/5

4) Urgent works to be financed by loans to be obtained from Govt are 6. The loan required for these works seems to be 3,75,000. The request of the P. U. seems to be that this loan may be sanctioned early so that it may be drawn in the early part of next year.

5) The Branch may be consulted.

AD 12/5 - 6) The loan asked for is Rs 3,75,000. The amount of instalments in respect of each item and the revenue earmarked for repayment of instalment are mentioned in cols 6 & 7 of the statement accompanying the President's letter.

7) The request of the P. U. came for a loan of Rs 47,000 for the construction of shops in the Vani Vilas market - the item is included in the statement now sent - was negatived for reasons mentioned in the Office letter No L 3979 of 28.11.31 & the proposal was

Serial
No

Directed to be over the next budget time. Refce
is made to the notes & orders in paras 16 to 30 in
the connected file (for file 7 30 Rs 36 44 etc.)

2) What the existing ~~condition~~ financial
condition of the Municipalities is & whether they are
regularly repaying the instalments of the loan
already taken have, if necessary, to be ascertained
from the Comptroller. Regarding Water supply maintenance
charges, the Municipalities in areas 2 & 3 has been
advised that unless the amount is paid up before the
end of June next, the Comptroller may adjust the
same out of the funds of the HES in the treasury
under the provisions of the Account Code. The De Cancell
however, have been using as a reason for non payment,
the delay in the payment of the departmental dues
in respect of water charges, house tax etc, and the Heads
of Depts concerned have been written to by GAT directing
the early adjustment of the dues.

3) For order. The full decy may be

U O No 42/MAD dated 15th June 1932

Returned with compliments.

17) The financial ^{condition} of the Municipality continues to be in the same adverse condition and the payment of Government dues except loan instalments is not regular as reported already to Government in this office unofficial Note No 5/Loans dated 29th September 1931 in another file

3 The present condition is as follows -

Loans	R\$ 4,14,230-12-0
Deposits	45,305-0-0
Advances	61,184-2-9
Imprest	600-0-0
Loan to Municipal Co-operative Society	1,000-0-0

Total debt 3,96,751-9-3

Service head 3,05,388-6-0

91,363-3-3

19) The closing balance for May 1932 was R\$ 91,363-3-3 as detailed above, of which R\$ 45,305/- is the deposit balance. Out of this deposit amount, only R\$ 22,655/- relates to the Municipal Funds proper, as R\$ 22,650/- is to be refunded to parties as shown below

Deposits for Milk centres	R\$ 18,600
Tender deposits repayable	3,200
Instalments of Tongas payable to Palace	850
	22,650

20) The average receipts and payments for June 1932 including repayment of instalment of Loan works upto R\$ 1,23,047-0-0 and R\$ 1,18,547-0-0 respectively and the closing balance after paying up the repayable deposits works upto R\$ 73,200/-

NOTE—Contn Sheet

to be passed in regard to the five remaining items
in the State sent by the President

26) Regarding improvements to Water supply in
the Mysore cat, reference is made to the letter of the
Dir of Health D. 18.4.32 to the President. In para 2
of that letter, it is suggested that items 4 & 5 ^{in the estimate} maybe
deferred. The Council have approved of the whole estimate
for 3 lakhs & resolved that Rs 2 lakhs be borrowed from
Govt for the work. It is stated that the balance of Rs 1 lakh
represents the Govt share, ~~and~~ the Govt having agreed to
bear one third of the cost of the improvements. The file relating
to the subject is linked herewith

27) The file may be referred to Fin Secy with
reference to para 10 supra.

Genl Secy

22/6 (32
Am 21/6

29) The financial position of the State is not at present
permitted of the grant of a loan of Rs 2 lakhs. Besides
the Govt has not been able to keep to its past obligations.

The Director of Health is not considering items 4 & 5 to be
urgent. In view of this, it seems better to bring Rs 20000
may perhaps be made available now. If the Govt cannot meet
this sum, much of its work will be a loss. May be
sanctioned at the present time, the question of contribution of Govt
being left open for later consideration when the whole scheme is put

as mentioned in the
Staff Salary the Pension
(Flag Y)

31) The total amount of loan asked for by the Municipal Council is Rs 3,90,000, of which a loan of Rs 50,000 has already been sanctioned for the tarring of roads. The remaining items amounting to Rs 3,40,000- are as follows -

(1) Construction of sheep slaughter house	Rs 15,000
(2) Construction of mutton stalls to the west of Devaraja market	" 25,000
(3) Extension of Sewage Farm	" 50,000
(4) Construction of shops in the Vani Vilas market	" 50,000
(5) Water Supply Scheme	2,00,000
	<u>Rs 3,40,000</u>

32) Out of these 5 items, the last, namely, water supply scheme, comprises the following parts -

(i) Cost of three units filter with pipe fitting and special connections	" 25,000
(ii) Cost of motor and pump to lift 1.50 M G water to the High Level Reservoir	" 18,000
(iii) Housing motor and filters in a temporary zinc shed	" 5,000
(iv) Increasing the capacity of High Level Reservoir 1.5 M G	1,11,600
(v) Improvements to Distribution	1,10,740
	<u>2,70,340</u>

(Rs 3 lakhs in round figures)
of which Rs 2 lakhs is proposed to be taken as loan

33) The opinion of the Director of Health is confined to item No (5) - water supply scheme - and he says that of the

F

NOTE—Contn Sheet

loan to engine. as - *4437*
 File No 246 of 1931

General Secretary

Five parts comprising the estimate, Nos (iv) and (v) may be deferred, to be taken up later as funds permit. If these two are left out, the total amount required for parts (i) (ii) and (iii) will be Rs. 48,000 (or ~~Rx~~ about Rs. 50,000.) The Director of Health has not offered any opinion about items (1) to (4).

(1) Taking Rs. 50,000 as immediately required for the water supply scheme, the total amount of loan required will be-

(1) Sheep slaughter house	Rs. 15,000
(2) Lutton stall	" 25,000
(3) Extension of Sewage Farm	" 50,000
(4) Shops in Vani Vilas market	" 50,000
(5) Water Supply Scheme	" 50,000

Returned with compliments.

2. A review of the Financial position of the Mysore City Municipality was given in this office reply U.O. No.5/Loans dated 29th September 1931 (Flag H of the Secretariat File No.7-30). The following particulars are intended to supplement the information furnished therein.

3. A further loan of Rs 50,000/- was sanctioned in Jun 1932 (Vide G.O. No. L. 8276-8/M1. 80-31-7 dated 13th June 1932) thus bringing the total of the sanctioned loans to Rs 5,25,000/-. The amount actually drawn -- by the Municipality to the end of 31-32 was Rs 4,55,000/- The instalments of loans with interest which fell due up to the end of the last official year have been -- paid up. Excluding repayments, the loan outstanding on 1-7-32 according to the books of this office was Rs 4,06,346-2-0.

4. The treasury balance at the credit of the -- Municipal Account on the 30th June 1932 was Rs 17,286-12-4

5. At the close of the financial year 31-32 the arrears of claims of Government Departments and other institutions against the Municipality stood as under.

Amount due	On what account	Remarks.
47,250- 0-0	Water supply maintenance charges from 1st Sept. 31 to end of June 1932	
15,752- 5-0	Lighting charges due to the Electrical Department.	The figure was furnished by the Financial Branch of the Chief Electrical

Engineer's Office. It is understood that there is some dispute regarding the number of lights for which power was supplied, and that a reference made by the Deptt. in this connection is pending orders of Government.

The matter is under
consideration with the
Chaplaincy. The amount
involved is Rs 7843-2-0 up to
31st Dec 1931. This is disputed by the
Municipality & the matter is to
be further referred to the
Depts

15/7

80, 766 1 2 Total

6. The transactions during the year and the cash position on 30th June 1932 were as under .

Opening balance	...	88,500
Receipts during the year		<u>8,18,508</u>
	Total	9,07,008
Disbursements		<u>8,66,416</u>
Closing balance		<u>40,592/-</u>

7. A comparative statement of receipts under the principal heads of revenue is given below -

Heads of Revenue	29-30	30-31	31-32
Octroi	1,30,531	1,19,613	1,18,875
Taxes on Buildings	51,608	50,769	67,308
-Do- Vehicles	21,661	24,303	27,078
Flat rate water connection	62,019	61,833	68,875
Water Tax	27,094	26,134	34,729
Lighting tax	9,969	9,928	12,638
Cons. cess	...	...	8,807
Tolls	48,850	53,905	65,381
Pounds	1,945	1,712	2,308
Markets of St. houses	70,638	68,389	72,252
Levage farm	7,758	10,189	16,741
Drainage cess	3,038	2,625	3,045
	<u>4,35,111</u>	<u>4,29,400</u>	<u>4,98,037</u>

8. As nearly 81 thousand rupees are due from the Municipality to Government Departments it seems to be undesirable to sanction the heavy loan referred to in para. 34. There is also no provision in the budget for the grant of this loan.

M. Venkatesaiah
Comptroller.

27. See me with the Comptroller.

29 The revised proposals now submitted are as follows

(a) For the sheep slaughter house and the removal of mutton stalls, the Municipal Council proposes to spend out of the normal resources and the loan ^{first} asked for ~~has been withdrawn~~ is not necessary

(b) For the extension of the Sewage Farm, a loan of Rs. 15,000 is now asked for against Rs. 50,000 originally proposed. The area to be brought under cultivation newly has been reduced from 142 acres to about 67 acres.

(c) For extension of shops in Vani Vilas a market, the entire loan of Rs. 50,000 asked for is stated to be necessary, but it is proposed to draw one-half namely, Rs. 25,000 during the current year and the remaining half during 1933-34.

(d) For water supply, the Municipal Council considers that execution of works to the extent of Rs. 3.3 lakhs is necessary and that out of this, works to the extent of Rs. 1,11,220 are to be urgently executed. ~~The Municipal Council~~ ~~proposes~~ proposes that the Government may be pleased to carry out, out of State Funds the urgent works costing Rs. 1,11,220 and if this done, ~~the Government will be~~ ^{have met} ~~absolved from meeting~~ their share of the whole cost of the improvements required. The Municipal Council propose to meet its share of the cost in five years at the rate of Rs. 50,000 per year by taking a loan of the amount from Government.

50) The Municipal Council expects 4000 fresh applications for house connections during the next five years and the flat rate expected on this account and the water charges from these ^{and} new extensions is expected to cover the amount

File No

246 of 1931

General and Revenue
Secretariat

to be set apart for repaying the loan in 15 or 20 years.

1) The exact amount to be contributed by the Government in this connection and the amount of loan to be advanced to the Municipal Council for this purpose can be determined only after a decision is arrived at, as regards the exact works to be executed, ~~urgently at present~~. In accordance with the proposals made in para 36 of the notes, the amount urgently required in this connection is only Rs. 48,000. The installation of a duplicate Chlorinator Plant at a cost of Rs. 5,600 has been urged by the Sanitary Engineer, and if this is considered to be also urgent, the amount that will have to be spent urgently is Rs. 53,600 and the amount to be advanced to the Municipal Council will be about Rs. 36,000, provided all other works are to be deferred for the present.

52) The proposals as revised above will involve the grant of ~~about of Rs.~~ ^{about} a loan of Rs. 1,00,000 as detailed below---

(i) ~~For~~ Sewage Farm.	Rs. 15,000
(ii) Shops in Vani Vilas Market.	50,000
(iii) Water Supply.	36,000
Total.	<u>1,01,000/-</u>

Items (i) and (ii) are not, however, so urgent as item No. (iii). The point for consideration is what amount will ^{have to} be advanced to the Municipal Council.

In this connection, the Municipal Council proposes that the loans already granted for tarring roads may be ~~recovered~~ ^{recovered} in twenty years instead of in ten years. According to the budget of the Municipal Council for the year 1932-33, the normal income is Rs. 6,40,000 while the normal expenditure is Rs. 6,00,000. Out of the surplus of Rs. 40,000, the Municipal Council has to meet the charges on account of interest and repayment of instalments of loans besides providing adequately for the maintenance

Loan to the Mysore City Municipality

1557

[App F III-2

General and Revenue
Secretariat

File No

246 of 1931.

Serial
No

of tarred roads and optional measures. The Chief - -
Engineer has been requested to submit a report ~~for~~ as to
the amount that will be required for the maintenance of
tarred roads. ^{It may be} ~~Assumed~~ that after providing for this and
optional works, a sum of Rs. 30,000 will be available for
discharging the loans ~~out of the annual income.~~

55 The total loan outstanding on 1st July 1932 against
the Municipal Council amounts to Rs. 4,06,346. Adding
to this the ~~sum~~ ^{loan} of Rs. 50,000 on account of tarring roads
since sanctioned and of Rs. 36,000 now required for water
supply the total amount to be recovered would amount to
Rs. 4,92,000. Assuming that the whole of this amount will
have to be repaid in twenty years at 5% interest, the --
amount that will have to be set apart annually for its dis-
charge will be Rs. 39,478 which is just the amount by --
which the normal income ~~x~~ exceeds the normal expenditure
according to the sanctioned budget of 1932-33.

56 From the above it will be seen that the finances of
the Municipal Council do not warrant the grant of even the
sum of Rs. 36,000 urgently required for the improvement
of the water supply. As this expenditure is one that
cannot be put off ~~ix~~ any longer, it appears expedient to
limit the further loans to be made only for the improve-
ment of water supply. *for the present*

57
5/11/32

57 With reference to the point mentioned
at A on the last page, viz the exact works
to be executed immediately for improvement of water
supply, it is necessary to call for the letter from the
Bureau, Sanitary, in which an immediate expenditure of Rs. 11,11,111
is recommended. This conflicts with letter of 28/4/32 of the

Letter no 'C 164-12' dated 24/10/32 from the Director of Health in Mysore ^{stating} ~~requesting~~ that the scheme estimated to cost Rs 1,01,070 has to be worked up immediately and request that Government may advance the money in view of the urgency.

64) Submitted and dated with ref to para 23.

Rs 45
26 10 32

Submitted with reference to para 40 above.

65

The Municipal Council have now sent revised proposals in regard to the loan required, which briefly are as follows —

- (1) Rs 15,000 for the Extension of the Sewage Farm, the area to be acquired straight under cultivation being restricted for the present
- (2) Rs 50,000 for the Extension of shops in the Vani Vilas Market — Rs 25,000 to be drawn this year & the balance next year
- (3) Rs 2,00,000 for Water Supply Improvement

P u. D. II

66- In regard to the last, it will be seen from para 324 of the President's letter of 9/32 that the latest scheme as approved by the Municipal Council on the recommendation of the Bureau of Sanitary Engineering, is estimated to cost 33 lakhs. It is divided into 3 parts which are to be taken up in stages & the whole scheme worked out in 4 or 5 years. The first stage relating to the protection and augmentation of the supply at the pumping and filter heads costs ^{roughly 107 lakhs} ~~roughly 107 lakhs~~ and this is considered to be most urgent and intended to be a safeguard against

NOTE—Contn Sheet.

Loan to Mysore City -
1925

to Mysore

General Secretary

246 of 1931

File No

a sudden breakdown in pumping which may be apprehended at any moment in the existing conditions. The Sanitary Engineer's letter no SE 240 of 28 8 1932 to the Dir of Health explains the position.

67 The proposal of the Municipal Council is that Govt should give administrative sanction to the entire scheme and advance the cost of the 1st stage, viz about Rs 107 lakhs which will be their share of the total cost of the scheme, the Municipal Council's share of about 2 lakhs being met by a loan from Govt. to be drawn in annual instalments of not less than Rs 50,000.

68 The idea of the Municipal Council seems to be to make the loan repayable in 20 years, and it is also requested that the terming of 2½ lakhs may be made repayable in 20 instead of 10 years as now sanctioned, so as to make the instalments easy.

69 In regard to the water supply improvement estimate, one part requiring consideration is not referred to in the President's letter. The sum of Rs 55,000 spent by the Govt for the Railway Workshop Main - which had to be done by the Municipal Council - has to be added to the estimate and the shares of the Govt and the M.C. worked out on that basis. So calculated, the total estimate will be Rs 3,85,000 and the Govt share Rs 1,28,000 roughly. If Rs 55,000 is deducted out of the latter, the Govt share gets reduced to Rs 73,000.

70 As regards the ways and means for repaying the loan asked for, it is stated in para 4.6 and 10 of the President's letter of 26-5-32 that

74 From paras 55 and 56 above it will be seen that
the Municipality which has already borrowed more than
Rs 4 lakhs from Government is not in a position to pay
interest and sinking fund charges for any more loan
Even now the Municipality have not completely discharged
of the dues to Government for which they have been given
time till December 1932 and until their financial con-
dition improves and until they have discharged all their

Secretariat

liabilities to Government, ~~they~~^{it} cannot be given any further loan

75 There is no provision in the Budget for the grant of such a loan and Government also which have got commitments in many directions, have no funds at present to sanction such a loan. The most urgent requirement of Mysore was ~~in regard to the Water Supply~~^{to ensure the against a break down of} and the Executive Engineer Mr. Marker has stated in para 2 of his letter of 31st May 1932 that the recently sanctioned purchase of spare Pump set for Belagola at a cost of Rs 27,100/- would be decidedly a great relief to the Pumping Station. So, the fear that at any moment the water supply to Mysore may break down has been removed. The other proposals are only for improving the quantity and quality of water. In the present state of finances of both the Municipality and the Government, such improvements which have been under discussion for the last two or three years may well continue ~~to be under discussion for another two years.~~^{as such until better times.}

76 Incidentally, I have also to point out that the following 2 points of the Municipality are not financially acceptable.-

(1) Extending the period of repayment of the loan for tarring the roads from 10 years to 20 years to enable the Municipality to have larger resources during these years. The period of a loan should generally be not more than the period of the work for which it has been utilised. The life time of a tarred road is not likely to be more than 10 years and the loan

General and Revenue
Secretariat

File No

[App F III-2]

Serial
No

loan taken for constructing a tarred road cannot be extended for a longer period.

(2) The proposal that a large scheme may be sanctioned by Government and only a small portion of it taken up for execution immediately and the ~~the~~ portion financed entirely from the Government share of cost of the large scheme, putting off indefinitely the Municipality's share, does not seem to be correct. When a large scheme is sanctioned and is required to be financed partly by Government and partly by another Body, the entire quota of the other Body should be spent first and if this is not done for one reason or another, at least the expenditure as it is incurred must be charged proportionately between Government and that Body.

Ml. FILE No 246 192/31

Discussed with Mr. E.R.Garudachar

80

The Municipal Council, the Director of Health and the Sanitary Engineer - all of them consider that the first instalment of the Water Supply Works proposed in the President's letter dated 19th October 1932, are very urgently required. The pumping capacity at both Belagola and Jewel Filters is below the requirements of the City. I understand from Mr. Garudachar that the daily consumption normally is about 3½ millions and ^{that} on special occasions it exceeds 4 millions. Against this demand, the pumping capacity at both the places is only 2 millions. An additional pump at Belagola will only serve as a stand-by which is badly wanted and also help to pump more ^{un-}filtered water into the City. For the use of this additional unfiltered supply, increased filtering and pumping capacity is necessary at the Jewel Filters. It is necessary, I think, to allow these Works to be carried out without any further delay.

81 I do not think the aggregate estimate of Rs 3.33 lakhs need be sanctioned now. The question of financing the second and third instalments presents difficulties and until it is solved, these instalments should stand over. The proposal of the Municipal Council that the one-third cost of the total scheme representing the contribution of Government should be paid first for financing the first instalment cannot also be accepted.

DEWAN'S MINUTE

24

M. FILE No 246 19231

82 Of the six items proposed, the last one estimated to cost Rs 27,100 has already been sanctioned though the question of provision of funds therefor has not yet been settled. I understand from Mr. Garudachar that the estimate for this item of work has been reduced by Rs 5,000/-. Making allowance for this reduction, the estimated cost of the six works comes to about Rs 96,000/-. Government have, at their own cost, laid a main to the Railway Workshops and it has cost about half a lakh of rupees. If the Works now under consideration and the main referred to, are taken together, the cost of the former will represent two-thirds of the outlay to be borne by the Municipal Council, the one-third to be borne by Government having been provided in the form of the main already laid.

83 I understand from the notes that a sum of Rs 50,000/- has recently been sanctioned as a loan to the Mysore City for tarring roads. This amount might be utilised towards the demand of ~~about~~ Rs 96,000/- to be met on account of Water Supply Works. For making up the balance, a sum of Rs 46,000/- might be allowed as an additional loan to the Municipality. *There may be some savings on other items as in the case of item no 6 and of so, this balance will be further reduced.*
84 The annual equated payments to be made by the Municipality *for this loan of Rs 46,000* should be considered as the ~~first~~ ^{present} charge on its revenues and these payments to Government should not be made to depend upon any revenues ~~hereafter~~ ^{hereafter} expected to be realised.

85 If the Municipality is agreeable to the above conditions, further action may be taken to

Letter - no L 70 1009 of 4/1/33 from the
President City Mtl Mysore, furnishing the
information called for

96 The President states that it is both too
late and quite inexpedient to divert any
portion of the grant meant for carrying out
towards the water supply scheme, and that
the work connected with the ^{improvements to the} water supply to
the city should be carried out without further
loss of time and that an additional grant of
Rs 50,000 cannot be avoided or postponed

97 The President further adds that the entire
scheme of improving the city water supply will
have to be financed by Govt partly as a
contribution and partly as a loan and the
required amount will have to be advanced by
Govt to the extent possible from year to year and
adjustments to be made between municipal funds
and State funds considered separately and requests
that an additional sum of Rs 50,000, which is
absolutely necessary may be sanctioned

98 Submitted with reference to above ss supra

Rs 46000/- by a Govt as a loan may be anticipated and arrangements may be made to purchase the necessary machines has been noted and will be done pending consideration of the proposals.

135) Submitted for orders

20/8/33

136 The Mun' Council ~~was to~~ calculate

the Govt share of the cost of the scheme on the basis of the total estimate of 33 lakhs - for all the stages of improvement and show that even after taking into consideration the sum of Rs 50,000 spent ^{by Govt} for the Ry Workshop-main, the balance payable by them is Rs 77 lakhs. This Office letter no 4002 of 8/12/32 clearly stated that Govt were not in favor of sanctioning the aggregate estimate referred to & that the proposal by the MCL that one third cost of the total scheme representing the Govt share should be paid first for financing the first instalment could not also be accepted.

137 The Mun' Council also say that the loan obligation on account of Rs 50,000 spent for laying the main to the Ry Workshop, ^{which is outside the MCL limits} is a heavy burden on the Municipality & that it is reasonable to exclude this amount from calculation till such time as the whole area comes within the municipal limits. It is doubtful if the matter can be reconsidered.

138 Lastly the MCL request that the whole of the amount of Rs 96,000 now required may not be treated as a loan and that only Rs 50,000 out of it

Improvement of the Bangalore City water supply

General and Revenue
Secretariat

File No

246 of 1931

[App F III-2

Serial
No

may be treated as a loan, repayable in ten years, and the balance of Rs 46,000 being treated as Govt contribution. In making this request, the M.C.C. seem to have gone back on what was stated in the last para of the President's letter of 4.1.33, which seemed to show that the whole of Rs 96,000 was asked for as loan, and they request a reconsideration of the ams already passed by Govt.

S

(139) In this office letter of 25-1-33, the President was asked to state how the M.C.C. propose to repay the loan of Rs 96,000 without reducing the provision for the repayment of the loans already taken. The President states that the repayments on account of the loan of Rs 50,000 now asked for can be arranged by earmarking, for this purpose, the income derived from extra house connections given from the year 1931-32 & those to be given hereafter.

(140) Suggest for ams. The Fin. Secy may be consulted.

20/4/33

WATER SUPPLY IMPROVEMENTS, MYSORE CITY.

For improving the Water Supply in Mysore City the Bureau of Sanitary Engineering prepared a ⁷scheme estimated to cost Rs. ~~3.3~~^{3.3} lakhs and the Municipal Council made the following proposals for working out the scheme and financing it:-

(i) The whole scheme to be sanctioned by Government for being worked out in 4 or 5 years.

(ii) The first stage of the scheme, costing Rs. 1.07 lakhs, to be taken up immediately.

(iii) The whole scheme to be financed by the Municipality and the Government in the proportion of 2:1.

(iv) Government to pay its one-third share of the cost of the scheme viz., one and odd lakhs, immediately for working out the first stage.

(v) The municipality's share viz., 2 lakhs, to be met by taking a loan from Government, at the rate of Rs. 50,000/- per annum. The loan was proposed to be taken for a period of 15 or 20 years and it was stated that the revenue from flat rate and water charges from house connections would be sufficient to ^{repay}~~repay~~ the loan.

(2) On a full consideration of the proposals and after personal discussion of the question by the Offg. Dewan with the Ex. Sanitary Engineer, the Municipal Council was informed that Government could not sanction the aggregate estimate of 3.30 lakhs ~~now~~, as the second and third stages of the scheme presented difficulties and should therefore stand over and that they could not also accept the proposal that they should pay one-third cost of the whole scheme, which represents their contribution - for financing the first stage. The Municipal Council was also informed that the cost of the first stage of the scheme, exclusive of the cost of a pumping set already sanctioned, came to about Rs. 96,000/-, that Government having at their own cost laid a main to the Railway workshop at cost of Rs.50,000/- this amount had to be taken into account in fixing their share towards the cost of the improvements in the first stage and that on this basis the --- Municipal Council had to bear the whole of the sum of Rs.96,000/-, the one-third share to be borne by Government having been provided in the form of the main. It was suggested to the Municipal Council that the amount of Rs.50,000/- sanctioned for tarring roads might be utilized for meeting a portion of the

the said sum of Rs.96,000/- and that if this was done, Government would be prepared to grant a loan of Rs.46,000/- at 6 per cent interest—subject to the condition that the whole loan of Rs.96,000/- is discharged in ten annual equated instalments, treating them as a first charge on the present revenues of the "municipal Council.

7 (3) In reply the President ^{x stated} replied that the amount of Rs.50,000/- sanctioned for tarring roads could not be diverted towards the water supply scheme and that the question of treating the cost of nearly half a lakh of rupees incurred by Government for laying a main to the Railway Workshop, as part of the contribution payable by Government did not arise and requested that the entire amount of Rs.96,000/- might be sanctioned.

D (4) The President was next ^x informed that Government could not reconsider their order to take the cost of laying the Railway main as ^{their} ~~that~~ share of the cost of the improvements and the "municipal Council was asked how it proposed to repay the loan of Rs.96,000 without reducing the provision for the repayment of loans already taken after meeting the ordinary expenditure. It was also stated that it was not possible to sanction the

the additional loan applied for unless the council established their capacity to repay it.

C (5) Subsequently on a reference received ^{from} ~~by~~ the Sanitary Engineer that funds were required for carrying out certain urgent works, the President was informed that Government would be prepared to give a loan of Rs.46,000/- for the purpose and that orders ^{might} ~~may~~ be placed, in anticipation of sanction for the necessary machinery.

P. u. D (6) In his present reference the President states that as the income derived from the line to the Railway Workshop is barely sufficient to meet the proportionate maintenance charges for the supply to that area and as the Municipality is not deriving any income in respect of that area, it seems reasonable to exclude the sum of Rs.50,000 incurred for the main from the Municipal Council's loan obligations, and that the present grant of Rs.46,000/- does not go very far to improve the pumping units etc., unless the first stage of the scheme is fully worked out. He requests therefore that the total amount of Rs.96,000/- be sanctioned, Rs. ~~Rs~~ 46,000, being treated as a portion of Government contribution, the balance of Rs.50,000

(111) what the rate of interest and ^{the} period of the loan are to be.

(147) I have gone through the file carefully. The financial position of the Municipality has been fairly accurately appraised in the note put up by the Comptroller. I admit that the loan obligations of the Municipality are heavy enough. But improvements to the Water Supply affect not only the municipal rate payers in the City, but to a great extent the Public parks, the Palace and Government institutions. Rs.46,000 now sanctioned for purchase of pumping units and motors for Belagola pumping station and the Jewell Filters goes only half the way towards these improvements. It is not enough if only raw water is pumped in larger quantities. In the interests of the health of the City and the public institutions using the water, it is essential that improvements to the filters should be taken up at once. The money required for this purpose will have to be advanced by Government in view of the extreme urgency of the case. As regards improvement of the distribution system, the Municipality are willing to borrow Rs.50,000 and make

arrangements for repayment of the loan by annual instalments. Some extensions, particularly Chamundi Extension, Narasimharaja Mohalla and Kannegowdanakoppal suffer very severely for lack of adequate water supply. Rs.50,000 will be required to meet this want alone. This cannot be postponed.

by In this connection, it would not be out of place to submit to Government the fact that when in the year 1927, the responsibility for water supply maintenance charges between the Municipality and the Government was fixed in the proportion of 2 to 1* the maintenance charges amounted to only Rs.1,20,000. Now these charges have risen to Rs.1,60,000. Further, it is ^{behind} ~~seen~~ that out of 3.5 million gallons pumped per day, nearly one million gallons are consumed by the gardens and parks, and the public institutions etc. consume another $\frac{1}{2}$ million gallons. The rate payers actually get a little over half the quantity of water pumped. This inference has been drawn from the fact that during the recent breakdowns of the pumps and motors in the Filters, it was seen that by rigorous cutting ^{of} of water supply to gardens, the consumption of water went down by nearly .8 million gallons.* It seems therefore necessary to reconsider the proportion of the maintenance charges to be borne by the Municipality. If the Government are pleased to limit the liability of the Municipality to half, then nearly Rs.20,000 will be available every year to meet fresh loan obligations on account of the water supply to the City. The expenditure side of the Budget is gradually increasing on

on account of various new schemes without a corresponding increase in the revenue. Every attempt is being made to improve the revenue by indirect taxation. But the - present trade depression is a big handicap. There is, however some scope for increasing the revenue under Octroi. This will be taken up soon. In the accompanying note, I have submitted certain proposals for sympathetic consideration and they may, I beg, be favourably - - considered

1100

1100) The statement enclosed shews the present position of the Mysore City Municipality in respect of loans. It will be seen that the Municipal Council owes to Government a total sum of Rs.5,25,000. Out of this, a sum of Rs.1,04,737 will have been discharged by the end of June 1933, leaving a balance of Rs.4,20,263 on the 1st July 1933. This includes a sum of Rs.50,000 borrowed by the Council for the City Improvement Trust Board (which cannot borrow in its own name) for land Drainage Works. The responsibility for liquidating this amount is clearly that of the City Improvement Trust Board which has agreed to return the amount in 10 yearly equated payments of Rs.7,000. Thus the total amount of the loan for which the Municipal Council is responsible is Rs.3,70,263.

The yearly equated instalment for the whole loan of Rs.4,20,263 amounts to Rs.71,710 including interest charges. From this will have to be deducted a sum of Rs.20,000 made up as follows and payable by the City Improvement Trust Board and Government.

	Rs.
City Improvement Trust Board towards	
Mandy drainage loan	7,000
Do towards tarring roads.	8,000
Government for maintenance of provincial roads.	5,000
Total	<u>20,000</u>

The net amount repayable annually will then be Rs.51,710 which forms an appreciable part of the normal resources of the Municipality. From a perusal of the notes in the file it is seen that the financial position of the Municipality has been fairly accurately set out. In this connection, it has to be mentioned that the taxable capacity of the rate payers has been fully tapped and fresh taxation is out of the question. The normal growth in the revenues of the Municipality due to new constructions, extra water connections and development of markets will be fully required to carry out other urgent works of improvement

2

43

in the City. The present obligation of the Municipality in regard to the repayment of loans cannot be appreciably increased.

The Financial Secretary in his remarks dated 17-1-1933 has stated that unless the capacity of the Municipality to repay the loan is fully established, it will not be possible to give the additional loan asked for.

In respect of these remarks, I beg to urge the following circumstances for the consideration of Government:-

The Council are responsible for a loan of Rs.2,25,000 which they borrowed of their own accord for improvements to markets and sanitation and which they have been steadily repaying.

The amount borrowed for the tarring of roads, viz., Rs.2,50,000 was not on their initiative. When this question came up for consideration in the first instance, they were not in favour of a loan for this purpose, in preference to water supply improvements which they always considered as paramount and pressing, in view of the great hardship the rate payers were undergoing in the matter of an adequate supply of water - a bare necessity of life. They however had to borrow, and carry out the works having been repeatedly urged to take up the tarring schemes.

Similarly, the increased expenditure incidental to the transfer of primary education to the local education authority and the anti-malarial scheme etc., were in a way ~~imposed~~ ^{shouldered} on the Municipality, much against their financial capacity and they had to defer to the wishes of Government in the matter, as these schemes were in the interests of the moral and sanitary progress of the City. The recent proposals arising from the Health Appraisal Report received from the Director of Health for being

brought into effect, will also involve the Municipality in further extra expenditure.

Again, the case of Mysore City is unique. Being a capital with a tradition for general tidiness and public amenities - hardly to be surpassed elsewhere in India, with its annual fairs and festivities coming twice a year regularly and sometimes on occasions of the visit of distinguished personages, the Municipal Council have had to shoulder an expenditure out of proportion to their normal resources which no other city Municipality is called upon to do in the State. These special features and obligations deserve a sympathetic consideration at the hands of the Government. Either larger grants will have to be given to the Municipality for improvement works as is done in the Presidency towns of British India or if for financial reasons this is not possible, relief should be given to the Municipality in the matter of the repayment of loans. I would respectfully submit that in case larger grants cannot be given, recovery on account of at least half the loan given for the tarring of the roads may be postponed for some years.

Coming to the question of water supply which is the main subject matter of this note, it cannot be too strongly emphasised that it is one to be taken up without any loss of time and at any cost. The improvements at the Head-works are long overdue and repeated breakdowns resulting in untold hardship to the people has become a menace to the safety and convenience of the people. Within a month and a half recently, there have already been two breakdowns which involved merciless rationing of water supply to some areas and little or no supply to others situated at higher altitudes. In such places, water supply had to be carried and distributed through road water lorries. The present state of affairs cannot

continue long without affecting the supply seriously not only to the public but also to Government gardens, Government buildings and the Palace.

Similarly in respect of the distribution system, expenditure on any improvement which does not result in augmenting the present supply to the general public who have been clamouring for an adequate supply of water will not be appreciated and the Municipal Council will have to face a serious and severe opposition from the ratepayers. They thus feel that it is advisable to take up this work also simultaneously with the headworks.

With regard to the liquidation of the loan the sources from which it is intended to make repayments have already been indicated.* But Government do not seem to agree with the Council in this respect. To ensure prompt and punctual repayment of loans it is urged that Government may kindly see their way to ease the conditions of the present loan by extending the period and reducing the rate of interest on all loans to the present ruling rate.

in this office
letter No.G.T.
303 dated
22nd September
1932.

In this connection it has to be stated that some members of the Council with whom I have discussed the matter do not agree in the view that the period of repayment should correspond with the life of the tarred roads, viz., 10 years. There seem to be instances in which the tarred roads have lasted more than 10 years and even if they do not, a further loan may be floated against the amount liquidated till then, so that it will be a rolling one, until such time as the other previous loans are liquidated. Thereafter the Municipality itself will be in a position to maintain and continue the tarred roads.

It is therefore urged that Government may be

pleased to see their way to sanction the full loan of 2 lacs asked for, of which a major portion will be earmarked for the improvement of water supply. If this cannot be done, permission to float a debenture loan from the public not only for water supply improvements but also others mentioned in the previous letter No.G.T.503 dated 22nd September 1932 may be given. In this connection I would submit that all the loans now taken by the Municipality may be consolidated into a single loan, the period of repayment being extended to 20 years, at the present rate of interest, so that the Municipality may be enabled to take a further loan of 2 lacs. In this connection my suggestion for the relief of the tarred road loan indicated supra may kindly be given sympathetic consideration.

Some members of the Council with whom I ^{have} had discussion think that the whole question of the improvement of water supply may be thoroughly examined once for all by some officer of Government and that all the works required for putting the water supply on a satisfactory basis be executed finally, so that there may be no complaint from any quarter - the ratepayer, the Government Departments or the Palace for at least a considerable period. The entire sum required for the works may be advanced by Government to the Water Supply Department and the proportionate share thereof created as a loan to the Municipality, the period of repayment being fixed with due regard to the Municipal finances.

In connection with the present breakdown of water supply, I beg to state that for the last 3 days I am being constantly troubled by the rate-payers and the Councillors for better supply of water and I am at a loss to answer their demands.

M. M. M. M.
President.

As regards treating the whole sum of Rs 960
as a loan, I beg to submit that the Council
have resolved that the question of bearing their
share of the burden in respect of loans to be
sanctioned for the improvement of water supply
should be taken up for consideration when they
finally pass orders on the Scheme as a whole
and not on the piecemeal estimates sent up
from time to time for urgent works only.
When I submitted my note to Govt, I submitted
that the most urgent works would require of
about Rs 1,50,000/- (one lakh five hundred thousand)

NOTE—Contn Sheet

improvements at the Head works and Rs 5000/- for improvement of the distribution system) If, even this part Scheme is Sanctioned, Rs 46000/- will have to be treated as an outright grant from the Govt. and the balance as a loan to the M.C. Since submitting my note, the M.C. Council have examined the question of water supply improvements at a special meeting and come to the decision that it is very necessary that the whole Scheme of improvements should be examined once for all and all necessary works carried out without further loss of time and that the distribution system should be put right with as little delay as possible and that the amount required for this purpose may kindly be advanced by Govt. partly as a grant and partly as a loan. The resolution of the M.C. and the discussion will be separately submitted to Govt. soon. In view of what has transpired, it does not serve any useful purpose to confine our attention only to the advance of Rs 46000/- now Sanctioned.

- 2) As regards consulting Mr. Muldare regarding the investigation of the water supply problems, I beg to state that the Scheme for 3-3. laid off under Submitted to Govt. with my letter No G.T 503 dated 26.9.33 was the one furnished by the Bureau of San. Engineering. It has no doubt had the advice of Mr. Muldare in the matter. It does not seem necessary to consult him further in the regard to the technical details.
- 3) The need for investigation now is as regards the financial adjustment of the resources of the M.C. to meet the new loans to be obtained for these works.

Hand N-8

*A list containing the names of the Councillors that were present, may be placed in the file.

163 A deputation consisting of the President and a large number of Municipal Councillors* waited on me on the 11th instant for discussing the questions mentioned in the enclosures to the President's demi-official letters dated the 8th and 10th June 1933.

164 The most urgent of these questions is that of increasing the filtration and pumping capacities of the Head Works and improving the distribution system. I told the deputation that it would be well if the discussion on this occasion was limited to the consideration of this question. The deputation, ^{at} ~~had~~ first pressed for a settlement of all the five questions mentioned in the memorandum sent by the President, but on my telling them that it was not possible to take immediate decisions regarding them all and that any attempt at settling them ~~all~~ would result in further delay in carrying out the urgent water supply works, they agreed to my suggestion.

165 The deputation urged that at least the whole scheme for the improvement of the water supply works, estimated to cost Rs 3.3 lakhs, might be sanctioned at once and that Government might contribute one half of this amount as their share of ^{the} ~~cost for the execution of the scheme~~. The Department of Public Health and the Municipal Council have decided to carry out this scheme in stages and in view of this position, I stated that it would be sufficient for the present to discuss the question

57

of finding the ways and means for carrying out the first instalment of the scheme, leaving the consideration of the other instalments to be taken up later on. The deputation was anxious that the whole scheme should be sanctioned at once, but on my telling them that it was difficult to decide now the financing of the later stages of the scheme, they agreed to the consideration of ^{only} the first instalment of the scheme consisting of the following items:

(1)	Works enumerated in the enclosure to the Sanitary Engineer's letter dated 29th August 1932,	
and	estimated to cost	.. Rs 1.01 lakhs;
and (2)	Urgent distribution works	
	estimated to cost	.. 0.50 ,, .
	TOTAL	.. Rs 1.51 lakhs.

(1) This instalment of the scheme is considered most urgent by both the Public Health Department and the Municipality. The consideration of this question has been pending for over a year and it is not desirable that there should be any more delay in reaching a decision about it. The deputation requested that half the cost of this instalment might be contributed by Government and that a loan might be given to the Municipality to enable it to finance its half of the cost.

(2) The G.O. dated 30th January 1926 makes the Municipality responsible for meeting the entire cost of the capital works. As a large part of the water supplied by the ~~scheme~~ ^{project} is used for Government buildings and institutions, and ^{to} the Palace, the Municipality has all along been contending that the capital cost should be shared between itself and Government and that

DEWAN'S MINUTE

ML. FILE No 246 192/31

5-8

it should not be called upon to bear the whole ^{cost.} ~~at~~
~~it~~. It is on this ground that the cost of maintenance and operation is borne by the Municipality and Government in the proportion of 2 : 1 according to the G.O. dated 7th January 1927. The adoption of a similar sharing arrangement in respect of capital outlay is reasonable: vide opinions expressed on this point in the notes dated ~~_____~~ and 8/10/30 and 15/4/30 by the late Mr. Balasundaram Iyer and ~~by~~ myself. I accordingly stated that it would not be possible for Government to agree to contribute more than one-third of the cost.

24 -
 Pages 11 to 15 of the
 office note in ml 137-29
 (memo)

As regards counting the outlay incurred some time back by Government on laying a separate main to the Railway Workshop as their contribution towards the cost of the works now under consideration, the deputation urged that this pipe line was outside the municipal limits, that it was not bringing in any revenue other than about Rs 3,000/- paid by the ~~Railway~~ Workshop, and that it would not, therefore, be fair to take this item into calculation in this connection. There is considerable force in this view and we need not, therefore, press for treating the cost of this main - about Rs 50,000/- - as our contribution to the works now to be carried out. I, therefore, informed the deputation that the one-third cost of the works - about half a lakh of rupees - to be paid by Government would be separately contributed by them. As regards the balance of two-thirds - about a lakh of rupees - I added that Government would be prepared to make a loan to the Municipality on reasonable terms. The deputation agreed to this arrangement.

DEWAN'S MINUTE
M1. FILE No 246 1921

4035
29/5/21

169 There is no provision in the budget for next year for making the Government contribution referred to above. The works however ^{are} ~~being~~ very urgent, ^{and} it is necessary to carry them out next year and our contribution has to be found. The expenditure may be authorised and the question of ^{the} grant necessary therefor considered later on. For financing its share of the outlay, the Municipality may be given a loan of a lakh of rupees at five per cent interest and the loan may be made repayable in 15 annual instalments.

170 The case may be referred to the Financial Secretary and then circulated to the Members of Council.

NOTE—Contn Sheet

Submitted to His Highness.

These papers relate to the proposals of the Mysore City Municipal Council for the improvement of the water supply of the City, which have been under consideration for some time past.

T With a view to remove the defects in the water supply arrangements, several proposals have been made by the Municipality, but all of them have had to be held up on account of the heavy cost involved. In September 1932, the Bureau of Sanitary Engineering prepared a ^xscheme of improvements estimated to cost Rs 3.3 lakhs, which was proposed to be worked out in three stages, the improvement of the Pumping Units and increasing the number of filters costing Rs 1.1 lakhs being taken up in the first instance.

F The Municipal Council requested that administrative sanction might be accorded to the whole scheme, to be financed by the Municipality and Government in the proportion of 2 to 1, and that the cost of the first stage of the scheme amounting to Rs 1.1 lakhs might be borne by Government, as that represented their share. Government were not in favour of sanctioning the whole scheme, as the second and third stages were considered [^]to present difficulties, and they accordingly informed the Municipal Council that only the first stage might be taken up for the present. As regards financing the cost of the first instalment of the scheme, the Municipal Council were asked to take into account the sum of Rs 50,000/- spent by Government for laying a separate main to the Railway Workshop and treat it as the share of Government and meet the balance from the Municipal Funds.

A The Municipal Council did [^]not agree to this proposal and the matter has been under correspondence with them since December last.

With a view to discuss the whole question and arrive a prompt settlement, a deputation consisting of the President of the Municipal Council and a large number of Councillors waited on me at Mysore on the 11th instant. The details of the discussion and the conclusion arrived at are embodied in my

2156559 note of the 12th instant placed in the file. The points on *file Notes* which agreement was reached are the following:-

(1) For the present, only the most urgent items in the Improvement Scheme might be sanctioned, viz.,

(i)	the works enumerated in the enclosure to the Sanitary Engineer's letter dated the 29th August 1932 and estimated to cost ..	Rs 1.01 lakhs.
✓ (ii)	the urgent distribution works estimated to cost ..	0.50 ,,
Total		Rs 1.51 lakhs.

P (2) Government might contribute one-third of the capital outlay on these works on the analogy of the distribution between the Municipal Council and Government of the operation and maintenance charges under Government Order No. 4285-8/Ml.84-26-6 dated the 7th January 1927.

(3) In contributing the said one-third share, the cost incurred by Government in laying a separate main to the Railway Workshop be not taken into account and this share be separately paid by them; and,

(4) Government might give a loan of about a lakh of rupees to the Municipal Council on reasonable terms to meet their two-thirds share of the cost of the works.

It is proposed to sanction the improvement works referred to above, to make a contribution of about Rs 50,000/-, and to give a loan of about a lakh of rupees at 5 per cent interest repayable in 15 annual instalments. There is no provision in the Budget for next year for meeting the Government contribution

3.

contribution, but as the works are very urgent, the expenditure will be authorised and the question of an additional grant considered later on.

✕

These proposals are agreed to by the Members of Council and may be graciously approved.

The Secretary to Government,

General Department,

BANGALORE.

GEN. & REV. SECT.
7 MAY 1932
M. G. PRINCE

Sir,

I have the honour to forward herewith a statement showing the names of urgent works to be financed by loans to be obtained from Government during the year 1932-33, sanctioned by the Municipal Council at their meeting held on 30-4-1932 with the modification that the amount for water supply scheme might be raised from Rs.1 lakhs to Rs.2 lakhs, and to request that you will be so good as to obtain early sanction of Government

These are works pending from a long time for want of funds as could be seen from columns 4 and 5. Some of them are already sanctioned both by the Council and by the Government. The others are under submission to Government for sanction. Items 1 and 2 in the statement are to be taken up immediately after the loan applied for is sanctioned as both of them are pending execution from a long time for want of funds. Schemes for items 3 and 4 are ready and will be submitted to Government if the loan is granted early. Estimates for item 5, viz., tarring of roads have been submitted to the Chief Engineer for necessary scrutiny and transmission to you. Detailed estimates for item No.6, viz., water supply schemes have been called for from the Director of Public Health.

I therefore request that you will kindly have the loan sanctioned early to enable the works being started before the close of this official year and to draw the loan in the early part of July next.

I have the honour to be,

Sir,

No 28123 of 8632

Letter No.C 393/Enc.one dated 28th April 1932 from
J.V.Karve Esq.,M.B.,Ch.B(Editor),D.P.H (London), Director of
Health with the Government of His Highness the Maharaja of
Mysore, Bangalore, to the President, City Municipal Council
Mysore,

I have the honour to forward herein enclosed for favour of
your information a rough estimate costing Rs.2.70 lacs, of
immediate works required for supplying more quantity of drink-
ing water than at present to Mysore City. As I have said
the estimate is very approximate and it is better to adopt the
figure of Rs.3 lacs to be on the safe side.

Out of 5 items in the estimate Number 4. viz., increasing
the capacity of High Level Reservoir, may be deferred in view
of the provision for additional pumping capacity. The Improve-
ments to distribution may also be taken up in instalments as funds
permit.

The cost of items 1 to 3 is about Rs.50,000 leaving the
balance for the distribution and other improvements.

I request you to be so good as to favour me with the
opinion of your Council on the above proposals at an early date
On hearing from you, instructions will be issued for detailed
estimates.

OFFICE OF THE PRESIDENT,
CITY MUNICIPAL COUNCIL, MYSORE

DATED 24th June 1932
25th

DEWAN'S OFFICE
25 JUN 1932

Dear Sir,

I am forwarding herewith the modified design for the construction of sheep slaughter House, Mysore, for favour of submission to the Dewan for kind perusal. The site proposed for the building by Mr. Krumbiegel is near the cremation ground in Ediga as marked in the plan hereto appended and another site near the Essence Flour Mills will be selected.

Sailed
28
27/12/32

I have given the plan to the S.H.C. for preparing a fresh plan, as the one sent to the Dewan is not quite suitable.

Let
the plan be revised & forwarded

The approximate cost of the construction comes to nearly Rs. 15,000/-, and the scheme is proposed to be worked out by a loan to be financed by Government as already represented to the Dewan in person. The statement showing urgent works to be carried out by loan to be financed by Government has been forwarded to the General Secretary in this office letter No. G.T. 1588 dated 5th May 1932. Immediately after getting sanction to the loan prayed for, the estimate and plan will be placed before the Municipal Council for sanction, and arrangements made to start the work as early as practicable.

Signed
28-6-32

Yours sincerely,

Vedamalai

Where is the
29/6/32

The plan is
hereby

T. Singaravelu Modaliar, Esq., F.A., B.L.,

Private Secretary to the Dewan of Mysore,

BANGALORE.

Bangalore,
23th June 1932.

HP 3704
Dear Mr. Rama Iyer,

Please refer to your D.O. letter No.G.T.
1920 of the 25th instant enclosing a modified design
for a sheep slaughter House at Mysore. The Dewan
considers that the plan is not quite suitable and
a fresh one is under preparation by the Architect.

Yours sincerely,

Private Secretary to Dewan.

u 

N. 2800 / ME 246-31-1
S 1-8-32

To

The President,

City Municipal Council,

M y s o r e .

Sir,

3d July A-S Rao

with reference to the correspondence ending with your letter No. G T.1737 dated 27th March 1932, on the subject of the grant of a loan of Rs 3,90,000/- to the Municipality for carrying out certain urgent works during the current year, I am directed to state that the total amount of loans sanctioned so far to the Mysore Municipality comes to Rs 5,25,000/- including the loan of Rs 50,000/- sanctioned for the tarring of roads in June last

Government note that the actual amount of loan utilised by the Municipality up to the end of 1931-32 is about Rs 4,55,000 out of which - according to the figures furnished by the Comptroller, the amount outstanding on 1st July 1932 was Rs 4,06,346-2-0

Coming to the financial position of the Municipality the cash balance at the credit of the Municipality on 30th June 1932 was Rs 17286-12-0 As against the sum of Rs 79000 said to be due to the Municipality by Government Department the arrear claims of Government and other Departments against the Municipality at the close of the year amounted to Rs 81,000/- further ^{the} transactions during the year were as follows

Opening balance	Rs 88,506
Receipts during the year	8,18,508
Total Rs	9,07,008
Disbursements	8,66,416

Closing balance	Rs 40,592

It is also ~~seen~~ from a ~~review~~
of the Municipality under the several heads of
revenue, for the past three years, that there has
been no appreciable increase in revenue so as to
justify commitments over and above those already
existing

In these circumstances the financial position
of the Municipality does not seem to warrant the
grant of the additional loan ^{now} asked for. In case
the loan is sanctioned, the Municipal Council will
have to find a heavy sum annually towards repayment
of the annual instalment and interest and in the -
absence of definite information as to the additional
income expected from the several items of revenue
indicated in column 7 of the statement accompany-
ing your letter No G T 1588 dated 5th May 1932, y
the ways and means proposed for the discharge of
the loan cannot be deemed to be satisfactory

In view of the above, the matter requires fur-
ther investigation, and I am to request you to go ^{again}
into the question and furnish your remarks, if any,
with full information as to the revenue ear-marked
for paying the instalments in respect of the --
existing loans and the income expected to be derived
from the several items of revenue proposed in the -
statement referred to above for meeting the instal-
ments of the new loan

I have etc ,

GENERAL SECRETARY
20 SEP 1932
No 28

SIR,

Secy).
Seen this shd. be taken up
accordingly
RG
30/9/32
307

Referring to Government Order No L 800/ML 246-31-4 dated
the 1st August 1932 returning the papers connected with the loan
of Rs 3,90,000 asked for by the Municipality for further
investigation and remarks on the observations made, I have the
honour to submit herewith for information of Government the
resolution of the Special Committee appointed to deal with the
subject of water supply, as also that of the Municipal Council,
passed at a special meeting held on the 16th instant

2 Sheep Slaughter House and construction of mutton stalls

The several items of works for which loans were prayed for, as
noted in the statement were carefully reviewed and fully con-
sidered with reference to the resources available to ensure
their due liquidation. The amounts asked for, for the construction
of the sheep slaughter house and the shifting of the mutton stalls
in the Devaraj Market were considered to be not necessary, as it
was decided to carry out these works out of the normal resources
of the municipality spreading the expenditure, if necessary, over
two years' grants

3. Improving water supply to Mysore City - First, as regards
water supply which is the most important item requiring urgent
consideration, I have to state that the subject has been dealt in

all its aspects in recent years and several proposals submitted to Government The latest revised proposals furnished by the

1 Protecting and augmenting the supply at the pumping and filtering heads	Rs 1 07 lakhs	Bureau of Sanitary Engineering /divide
2 Improving city distribution "	1.12 "	the scheme into
3. Increasing High Level Reservoir	" 1.11 "	three parts to be
Total	" <u>3 30</u> "	taken up in stages,

the whole scheme estimated to cost roughly 3.3 lakhs as shown in the margin, being worked out in the course of 4 or 5 years

4 The Bureau of Sanitary Engineering have urged that with due regard to the security of water supply to the City, the first stage of the scheme, costing roughly 1 07 lakhs per annum

1. Installing 3 units of new type filters of 0.5 M.G capacity with all connections.	Rs.26,000 ✓	and comprising of the marginally noted items should
2. Pipe connections to the new type filters from settling tanks and to flume and Low Level Reservoir for feed and and wash	" 24,970 ✓	be immediately taken up The - Council also feel that it is - - undoubtedly very
3. Zinc shed for accommodating 3 units of new type filters behind the existing building	" 7,090 ✓	risky to postpone consideration of
4. Installing one new 2 M.G pumping set at Jewell Filters with pipe connections	" 18,000 ✓	this important - scheme any longer, and urge that not
5 Extension of Jewell Filter Buildings to east to accommodate the new 2 M.G pumping set, extending flume etc	" 4,750 ✓	only sanction to the first stage should be obtained - - immediately, but that Government may
6 One pumping unit of 5 M.G capacity for pumping raw water from the settling tanks with a building for the same	" 14,300	be requested to -
7. Replacing the existing 50 H.P motor to Filters ↓ by a 65 H.P. motor	" 5,510 ✓	accord administrative
(Submitted to Government for sanction)		sanction for the
8 Repairing the two new water settling tanks and restoring them to efficient service	" 5,000	whole scheme, without

9. Installing a duplicate chlorinator plant	Rs	5,600	without which there
		-----	can be no permanent
Total	"	1,11,220	improvement in the
		-----	supply of water to
		56	
		<u>105620</u>	

the city The whole scheme has to be financed partly by the - Municipality and partly by Government in the proportion of 2 to 1. The Municipal Council have urged that if in the first instance the Government share of the cost of the scheme, is advanced, it will be sufficient to meet the cost of the first stage of the scheme With regard to the municipal share, it is intended to distribute the expenditure over about five years drawing the loan amount in instalments of not less than Rs.50,000 From the demand there is for house connections, it may be safely assumed that more than 4,000 fresh applications for house connections will be received during the next five years and the resulting revenue from the flat rate and water charges from these and the new extensions, will be more than sufficient to repay the loan in 15 or 20 years

5 As regards the other works for which loans were required a detailed note on each of the schemes is appended showing the prospects of increasing the municipal revenue from these schemes and the ways and means for repayment of loans to be sanctioned by Government

6. Extension of Sewage Farm.- For the extension of the Sewage Farm, the loan originally asked for is Rs 50,000 for the - - acquisition of an extra extent of 142 acres of land and works connected with bringing them under cultivation On further consideration it is found advisable to take up this scheme in easy stages, acquiring in the first instance as much land as can be easily brought under cultivation without much expenditure for subsidiary works, and utilising an appreciable quantity of - sewage water that now finds its way to the Dalvoy Tank. The area of land that can thus be taken up will be about 67 acres and the

the outlay is roughly estimated at Rs.15,000 The loan for Rs.50,000 previously asked for from Government in this connection has thus been reduced for the present to Rs 15,000 This amount will have to be financed by a loan to be obtained from Government

7. The liquidation of this loan does not involve much difficulty The Sewage Farm, as it now stands, has become a paying concern as can be made out from the income and - expenditure for the last two years In addition to seasonal vegetable growing, the Farm produces Rhodes grass on a fairly large scale and besides supplying grass to the large number of bullocks owned by the Municipality for conservancy purposes, is also selling it to the public in the local market. There is an increasing demand for this commodity from the general public also, and with the existing acreage it is found very difficult to meet the demands It is therefore proposed to bring a larger area under Rhodes grass cultivation

8 Further, cocoanut cultivation which was started some years ago has just begun to yield and in a couple of years all the trees now standing will yield a fair revenue Besides, a scheme has also been sanctioned to extend the cocoanut - cultivation by planting 1,000 more plants which will add to the revenue from this source in course of time Plantain - cultivation has also been progressing briskly and a fair - amount of revenue from this source is expected during the - course of this year and will continue to pay in the years to follow

9. Taking these facts into consideration and having - regard to the present growth of income from the Farm it can be confidently stated that the scheme is a self-supporting one - The Council is therefore of opinion that a loan amounting to Rs.15,000 for the first stage of the scheme may be raised - without straining in any way the normal resources of the - Municipality

10 Extension of shops in the Vani Vilas Market - As regards extending the number of shops in the Vani Vilas Market, the - Municipal Council carefully considered the matter reviewing the possibility of getting the shops constructed through private agency as an alternative to constructing the shops out of - borrowed finances. They have come to the conclusion that it is more advantageous to develop municipal properties so as to add to its assets than allow private interests to intervene here. It is submitted that all the existing shops in that market are now occupied and there is a persistent demand for more shops. Any loan sanctioned for this scheme may be safely regarded as fully secured. If a loan of Rs 50,000 cannot be advanced in full for any reason, half the amount may be given this year and the remaining half next year

11. Tarring roads in the Mysore City. - In this connection the Municipal Council also desire to bring to the notice of the Government that they may reconsider the question of the period of repayment of the loan of Rs 2½ lakhs advanced for tarring of roads and extend the period from 10 to 20 years, thereby reducing the instalment under this item, so as to afford facilities to the municipality to meet other items, out of the amount thus released

12 In conclusion, I beg to bring to the notice of Government that the water supply question is one that may not be postponed any longer. From the correspondence received from the Health Department it is seen that if the additions and improvements suggested at the pumping station and filter beds are not immediately taken up and promptly carried out there may be a breakdown at any moment with the consequent stoppage or curtailment of water supply not only to the general public but also to the Government buildings as well as the Palace. In these circumstances, I request

request that the revised proposals may be favourably
considered at a very early date and sanction of
Government obtained

I have the honour to be,

Sir,

Your most obedient servant,

120. Report of the Committee appointed in Council's Resolution No.229 dated 30th January 1932 on the subject of improving the water supply to the Mysore City.

Resolution - The Municipal Council considered and discussed the Committee's report and the marginally noted references. In

1. Letter No.C.164-10 dated 3-9-1932 from the Director of Health in Mysore forwarding an estimate for Rs.1,01,070 for the first stage of the improvement of water supply to Mysore City.

accepting the report, the Council resolved as follows:-

2. Letter No.L.800/Ml.246-31-4 dated 1-8-1932 from the General Secretary to Government regarding the grant of a loan of Rs.3,90,000 to the Municipality for carrying out certain urgent works (including water supply and tarring roads) during the current year.

1. That the administrative sanction of Government be obtained for the entire scheme for the improvement of water supply to Mysore City, roughly estimated to cost about Rs.3,30,000, the

scheme being worked out in three stages, the most important ^{part} of it, viz., the improvement of the pumping units and increasing the number of filters costing about Rs.1,01,070 being taken up in the first instance;

2. That Government be requested to advance from State Funds the whole amount of Rs.1 lakh and odd required for the first stage of the scheme as this represents the share of cost of the entire scheme to be borne by Government;

3. That the other two stages of the scheme, viz., improving the city distribution and supplementing the storage reservoir be taken up gradually from year to year and completed in the course of the next 3 or 4 years, these two stages of the scheme being financed by a loan of Rs.2 lacs to be obtained from Government, in yearly instalments of not less than Rs.50,000 as the works progress;

4. That Government be approached with a request to ease the period of repayment of the loan granted for tarring of roads by extending the period from 10 to 20 years, as this will give considerable relief to municipal finances and afford additional facility for repayment of other loans of an urgent character which the Municipal Council have necessarily to borrow.

5. That out of the loan of Rs.50,000 required for the extension of the Sewage Farm, a sum of Rs.15,000 only be obtained in the first instance for the acquisition of nearly 67 acres, which will form the first stage of the development of the Farm and minimise the nuisance caused by the overflow of sewage into the Dalvot tank. For the repayment of this loan the income from the Sewage Farm which has been steadily improving will provide ample means besides the expected income from the proper cultivation of the additional 67 acres proposed to be acquired.

6. That as regards the loan of Rs.50,000 required for the extension of Vani Vilas Market, it may be submitted to Government that this is a self-supporting ^{scheme} income, inasmuch as the rent derivable from the 23 shops to be newly constructed, at the modest rate of Rs.12 per month (which is the average rate realised in the existing part of the market) will more than secure the necessary funds for repaying the loan in 20 years.

7. That the other items of work for which loans were asked (excluding a sum of Rs.50,000 for tarring other important roads in the city already sanctioned) be worked out from the ordinary resources of the Municipality, spreading the expenditure over this year and next year.

Absent.

Rao Bahadur Dharmaprakasa D.Banumiah, Esq.,

The Superintendent, Vani Vilas Water Works
Mysore, was also present at the request of the
President.

Subject.- Letter No.C.164-10 dated 3-9-1932 from the Director of Health in Mysore forwarding an estimate for Rs.1,01,070 for the first stage of the improvement of water supply to Mysore City.

In this connection the Committee also considered letter No.L 800/ML.246-31-4 dated 1-8-1932 from the General Secretary to Government regarding the grant of a loan of Rs.3,90,000 to the Municipality for carrying out certain urgent works (including water supply and tarring roads) during the current year.

The Committee are of opinion that the administrative sanction of Government may be obtained for the entire scheme roughly estimated to cost about Rs.3,00,000. But the scheme may be worked out in three stages, the most urgent part of it, viz., the improvement of the pumping units and increasing the number of filters costing about Rs.1,01,070 being taken up in the first instance. To finance this scheme, Government may be approached to advance the whole amount of Rs.1 lakh and odd required for the first stage of the scheme, as this sum roughly represents the share of cost of the entire scheme to be borne by Government. The other two stages of

scheme, viz., improving the city distribution and supplementing the storage reservoir may be taken up gradually from year to year and completed in the course of the next 3 or 4 years. These two stages of the scheme may be financed by obtaining from Government, in instalments as works progress, a total loan of 2 lakhs in the course of 4 or 5 years by which time there is every possibility of the house connections increasing in number to an extent sufficient to enable the Municipal Council to repay the loan within 15 or 20 years.

The Committee further suggest that in view of the fact that the loan obligations of the Municipality are heavy and a large sum out of the ordinary revenues is being earmarked for sinking fund and interest charges and having regard to the urgent need for carrying out water supply improvements which cannot be deferred without endangering the existing supply, Government may be approached to ease the period of repayment of the loan granted for tarring of roads by extending the period from 10 to 20 years. This will give considerable relief to municipal finances and afford additional facility for repayment of other loans of an urgent character which the Municipal Council have necessarily to borrow.

As regards the loan required for other works mentioned in the statement of urgent works to be financed by loans to be obtained from Government, the Committee after further examination are of opinion that out of the loan of Rs 50,000 provided for the extension of the Sewage Farm, a sum of Rs.15,000 may be obtained in the first instance for the acquisition of nearly 67 acres. If the development of this area be found to be self-supporting and profitable further extension of the scheme costing Rs.35,000 for acquiring the remaining extent of land will be taken up for consideration.

In regard to the construction of shops in the Vani

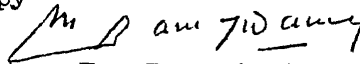

Vilas Market the Committee find that the loan of Rs.50,000 asked for is quite necessary in view of the fact that all the shops in this market are all occupied and that there is demand for more shops. If the loan of Rs.50,000 is sanctioned for the construction of 26 additional shops, the anticipated revenue of about Rs.4,000 from these shops will be earmarked for repayment of the loan in a period of 20 years and the Municipality will not therefore feel any financial difficulty on this account.

The other items of work in the statement referred to above may be deferred for the present or worked out from the ordinary resources of the Municipality.

Sd.B.T.Kesava Iyengar,
~~For~~ President.

FVR.

For President

Note on the construction of shops at Vani Vilasa Market Circle and Dodda Angadibeedi.

A semi - circle at the junction of Vani Vilasa and Gopalaraja Urs Stables Road or Dodda-Angadibeedi has been formed and market buildings have been constructed by the Municipality on the right hand or south west quadrant of the Circle. Some shops were constructed by private owners opposite to the buildings on the side north of Vani Vilasa road. As no one came forward to extend the buildings on the north-west to correspond with the Municipal structure on the opposite side to keep up the uniformity, proposals are now brought up to extend the market buildings.

2. The Trust Board are now forming the 3rd quadrant of the circle by acquiring properties and demolishing the same. It is therefore proposed to construct five shops in each of the two quadrants and 18 shops facing Dodda-Angadibeedi at a total cost of Rs.46,800/- or Rs.47,000/- in round figures as per details in the plan and estimates ~~already submitted + reviewed hereto appended~~. The design now proposed corresponds with the existing one as the scheme is practically an extension of the market buildings. The construction of five shops in the north-west quadrant abutting the private shops and 10 shops facing Dodda-Angadi-Beedi to the south of the Market buildings may be taken up immediately as the sites are almost ready for construction. The shops at the other quadrant and eight more shops facing Dodda-Angadi-Beedi, north of Vani Vilasa Road, may be taken up later as acquisition of properties proceeds and as sites are made available. There is already a keen demand for more shops in this area and the rental value of existing shops is going up.

3. The cost of work will have to be met by a loan of Rs.50,000/- to be taken from Government which will have

to be liquidated in twenty equated annual instalments of Rs.4,200/-. The anticipated revenue by the construction of these shops taking a minimum rent of Rs.12/- per month per shop will be Rs.4,032/- per annum; and the Municipality will be able to pay the annual instalments out of the anticipated rental income during the next twenty years, after which time, the property will begin to yield a net revenue of Rs.4,032/- per year which will be a good return to the Municipality on the Capital invested. This item is also seen to be self supporting. If the whole amount asked for as a loan cannot be advanced in one year, the advance may be made in two years at Rs.25,000/- a year, so that the work could be completed before 1934.

President,
City Municipal Council,
Chak Mysore.

24th Sept: 1932.

Note on the extension of Sewage Farm in Mysore:-

The area of the Sewage Farm at present is about 143 acres. Of this extent, about 30 acres are leased out for Betelvine cultivation, and about 50 acres are under direct cultivation by the Municipal agency. The remaining area consists of roads, paths, storm water drains etc. The gross earnings of the Farm during the year 1931-32 were Rs.17,500/- and the expenditure amounted to about Rs.13,000/- for establishment, reclamation of uncultivated lands, planting, and compensation to standing Vine crops. Even after cultivation of the existing extent, much of the sewage is running into waste. This waste water is being partly utilised by private owners below the Farm and partly drained into Dalavoy Tank below.

It is proposed to make use of the sewage running to waste for further cultivation of lands by extending the Farm both on the Southern and Eastern sides. The complete Scheme is to extend the cultivation of lands from the existing margin of the Farm up to the waterspread of the Dalavoy Tank on the South and up to the Nanjangud roadside on the East by acquiring a total extent of nearly 142 acres at an aggregate cost of about Rs.50,000/- including other subsidiary works connected therewith. For facility of extending the Farm in convenient stages, to ensure enough supply of Sewage effluent for the extended portion, and to secure adequate return on the capital invested, the whole scheme is proposed to be worked out in two stages noted below:-

- 1) By acquiring about 67 acres of land belonging to Nachanahally village at a cost of Rs.15,000/-, and
- 2) If the development of this area be found to be self supporting and profitable further extension of the scheme costing

Rs.35,000/- for acquiring the remaining extent of land may be taken up for future consideration.

The amount of Rs.15,000/- required for working out the 1st stage of the scheme will have to be financed by a loan to be obtained from Government. The annual repayment for liquidating the loan for a period of ten years will be Rs.2,100/- which could be very easily realised by the yield from the 67 acres of land to be acquired, most of which extent is already under cultivation by private owners. Even taking a net profit of about Rs.35/- per acre per year for the 1st few years the return will be adequate to meet the loan instalments. The income from the Sewage Farm has been steadily increasing and the whole scheme is a promising one.

24th Sept: 1932.

President,
City Municipal Council,
Mysore.

GENERAL DEPARTMENT
24 OCT
New S.S.

D.S. 1817
21/10

Adverting to correspondence ending with your letter No.L 2561/M1

246-31-6 dated the 6th instant regarding the first stage of the City
water supply improvement Scheme, costing roughly Rs.1.07, I have the
honour to state that an estimate for rupees 3 lakhs for increasing
the supply of drinking water was sanctioned by the Council in their
Resolution No.449-50 dated 30th April 1932 and that references have
been made to Government in the matter in this office letters No.1588,
1737 and 1750 dated 5th, 21st and 31st May 1932 respectively.

On a further reference from the Director of Health he was
informed in this office letter No.G.T.2 dated 1st July 1932 that it
is not possible to finance any scheme relating to water supply --
improvement, without the grant of a loan from Government.

In reply, the Director of Public Health in his letter No.C 28-5
dated 15th July 1932 stated that besides installing an additional
pumping set of 3 million gallons capacity at Belagola pumping station
other proposals costing Rs.3.33 lakhs were also necessary.

In view of the financial stringencies and the difficulty of
procuring the loan for the whole scheme in a lump, the Bureau of
Sanitary Engineering were requested to divide the scheme into three
parts to be taken up in stages, and the whole scheme estimated to

cost roughly 3.3 lakhs being worked out in the course of four or five years as already narrated^u paras 3 and 4 of my report No.G.T.503 dated 26th September 1932.

Copies of the later communications with abstract estimates and the reports accompanying them bringing to notice the seriousness of the situation are forwarded herewith for the information of Government as called for.

In these circumstances, I request that the revised proposals may be favourably considered at a very early date and sanction of Government obtained.

I have the honour to be,

Sir,

Your most obedient servant,

Misra

62K President.

PVR.

Letter No.C 164-10 dated 2nd/3rd September 1932 from the Director of Health with the Government of His Highness the Maharaja of Mysore, Bangalore, to the President, City Municipal Council, Mysore.

In continuation of my letters Nos.Camp C.393-3 dated 24th June 1932 and Camp C.393-7 dated 25th June 1932 in regard to proposals for improvements to Mysore City water supply, I have the honour to forward herewith for your information and action, an estimate for the first stage of the improvements, urgently required, to ensure for the time being, sufficient quantity of wholesome water to the City. They also afford adequate safeguard against any sudden break down in the pumping. Letter No.240 dated the 29th August 1932 from the Sanitary Engineer (Copy enclosed) explains briefly the case.

The estimated cost is Rs.1,01,070/-. I request you to be so good as to place the subject before your Council and intimate its decision to me.

"Copy"

President.

Letter No.S.E.240 dated 29th August 1932 from the Sanitary Engineer, to the Director of Health in Mysore.

Re: Improvements to Mysore City water supply.

The short comings of the Mysore City water supply have been under discussion for some time and a number of proposals have been submitted to Government for improving the present situation. All such proposals have been held up because of the initial costs and the difficulty for the Municipality and Government to find the necessary amounts.

In consultation with the Municipal President, it was thought that a sum of Rs.1 lac might be found for improvement to the water supply this year and it was decided that the most important items costing not more than this amount might be estimated on and -- submitted to the Municipality, for consideration. I am therefore enclosing herewith estimate in six items for the improvement of water supply to Mysore City costing Rs.1,01,070. All the items mentioned therein are urgently required not only for increasing the capacity of the filter plant, but to replace pumping sets which have been running continuously for a number of years without - replacement or overhauling.

The most important item is the 3 million gallon pumping set proposed for the Belagola Pumping Station including pipe connections etc. costing Rs.27,100/-. The next item and of equal importance is a proposed 2 million gallon pumping set at the Jewell Filters. The cost including the extension to the filter building to accommodate the pumping set amounts to Rs.22,780/-.

The next important item is the installation of two units of new type filters of 0.5 million gallons capacity each with provision for zinc shed accommodation and pipe connections from the settling tank. This installation costs Rs.51,190/-. It is requested that this matter be brought before the Municipal President so that immediate steps may be taken to relieve the precarious situation of the present water supply.

President.

Letter No.154 dated 31st May 1932, from the Executive Engineer,
7th June
Water Supply Division, Bangalore, to J.J.Mieldazies, Esq., B.Sc.
C.E., Rockefeller Foundation Sanitary Engineer, Bangalore.

Re:-Urgent works in connection with augmenting the supply
of water to Mysore City.

In continuation of this office No.D.O.38 dated 26-4-1932,
and our recent discussion in the matter of providing very
urgent works for immediate increase of water to Mysore City,
I have the honour to forward herewith an estimate for Rs.3.33
lakhs, for your information and submission to the Government
for very early action.

The whole plant at Mysore is working under great strain
for practically 24 hours every day for 365 days in the year.
With the creation of new extensions and building activities
the demand for water is increasing day by day, and especially
during Birthday and Dassarah with the influx of outside --
population in the City, it is impossible to meet the demand
without adding settledwater from the settling tanks to the
filtered water ~~adding~~ and throttling various valves and other
devices. This state of affairs cannot go on longer without a
serious breakdown someday or other. There are no spare pumps
and motor either at Belagola Pumping Station or the Jewell
Filters. Recently a Pumping set of 3 million gallons capacity
for Belagola is sanctioned and Stores Purchase Committee is
taking action to purchase the same as speedily as possible.
This will decidedly be a great relief to that pumping station.
But the spare pumping unit for Jewell Filters, though pressed
so often is not yet sanctioned. Item No.4 of the abstract
of this estimate includes this 2 million gallons pumping set
at a cost of Rs.18,000/-. The report accompanying the estimate
explains clearly the great necessity for buying this set.
This set along with the two existing sets will also be used
for hard wash water for the new 3 experimental filters proposed
in this estimate. Item Nos. 1 and 2 of the abstract estimate

relate to these 3 experimental filters. As each unit is of .5 million gallons, 3 units will give nearly 1.5 million gallons of water in addition to the present quantity - so that the City will have immediately at least 4 million gallons per day. The filters are designed for hard wash water type. The feed and wash water connections and other special fittings cost nearly Rs.24,970/- as per item No.2 of abstract estimate. The detailed report accompanying this estimate explains the necessity of various connections to filters, settling tanks, Low Level Reservoirs &c. The filters are at present proposed to be housed in a zinc sheet lean to shed against the back wall of the filter house. The 2 million gallons pumping set is proposed to be accommodated in the new extension of the building at a cost of Rs.4,750/- vide item 5 of the abstract.

Another important item that is included in this estimate is a low lift 5 million gallons capacity pumping set for lifting water from the two settling tanks at a cost of -- Rs.14,300/- vide - item No.6 of the abstract. As explained in the report accompanying that estimate nearly 4 million gallons of water in the storage tanks cannot be drawn to the filters owing to the draw level being only $4\frac{1}{2}$ ' below the full supply level. It is proposed to use this water remaining below the draw level by pumping it on to the filters. The settling tanks themselves require very extensive repairs as they are found leaky and cracks are seen on the surface of the sloping walls. They were constructed some more than 20 years ago and with settlement and soakage, leaks have appeared in many places. Item No.9 of the abstract is for these repairs at a cost of Rs.5,000/-.

Consequent on the increase of this filtered water, it is necessary to increase the capacity of High Level Reservoir to store 2 million gallons in all at a cost of Rs.1,11,600/- as per item 7 of the abstract estimate. This estimate was sent to the Government last year alone for sanction, but it was returned with the observation to bring it up again in the next year i.e., 1932-33.

Item No.8 of the abstract estimate is for replacing the existing 50 H.P. motor to filters by a 65 H.P. motor for the reasons explained in the report. This motor being not of adequate capacity gets heated very soon and is not capable of pumping the required quantity of water. It is likely to be burnt out someday causing much inconvenience to the water supply. It is therefore very necessary to change it.

A spare chlorination plant is also provided in this estimate of urgent works. The present plant is not at all satisfactory and is giving lot of trouble. It is therefore necessary to have a better plant so that chlorination may go on without any break.

There are certain parts of the town which are suffering badly from a long time for want of adequate size of distribution or mains &c., and some of the trunk mains themselves are to be increased in size. Item No.11 of the abstract estimate in which there are 7 sub-estimates for improving distribution in various localities gives details of these estimates which cost nearly Rs.1,10,740/-.

This whole estimate for urgent works for Mysore City for improving its water supply consists of 11 major items as shown in the abstract and costs Rs.3,33,560/-. Each item has its independent estimate and a clear report which explains the salient features of each work.

Bureau of Sanitary Engineering.

General Abstract Estimate for Improving water supply to Mysore City.

No.	Sub-heads of work.	Amount.	Total.
1.	1. Installing 3 units of new type filters of 0.5 m.g capacity with all connections.	26,000	
2.	2. Pipe connections to the new type filters from settling tanks and to flume and low level reservoir for feed and wash.	24,970	
3.	3. Zinc shed for accommodating 3 units of new type filters behind the existing building.	7,090	
4.	4. Installing one new 2 m.g. Pumping Set at Jewell Filters with pipe connections etc.	18,000	
5.	5. Extension of Jewell Filter Buildings to East to accommodate the new 2 m.g. Pumping Set, extending flume etc.	4,750	
6.	6. One pumping unit of 5 M.G. Capacity for pumping raw water from the Settling tanks with a building for the same.	14,300	
7.	7. Increasing High Level Reservoir to Store 2 M.G. on the aggregate.	1,11,600	
8.	8. Replacing the existing 50 H.P Motor to Filters by a 65 H.P Motor.	5,510	
9.	9. Repairing the two new water Settling Tanks and restoring them to efficient service L.S.	5,000	
10.	10. Estimate for installing a duplicate Chlorinator plant of the Vacuum type made at Jewell Filters.	5,600	
11.	11. Improving City Distributions:-		
(a)	(a) Laying a 10" C.I Main from the proposed High Level Reservoir up to Railway Station Circle.	33,500	
(b)	(b) Laying 8" C.I Main from Railway Station Circle to Kantharaj Urs Road.	37,294	
(c)	(c) Laying 6" & 4" C.I Main from Kantharaj Urs Road to Chamundi Extension.	10,970	
(d)	(d) Improving water Supply to Old Woodyard Seenerkatta and Bakshi Basappaaji Garden Extension.	6,240	
(e)	(e) Laying 6" & 4" C.I Main from Chamaraja Road 8" to Krishnaraja Road 3" C.I Main to improve water supply to Chamaraja Agrahar and Kanniah Gowdan Koppal.	8,850	
(f)	(f) Laying 3" C.I Main for improving the Northern side of Hazartad Mohalla.	3,736

"GRACE VILLE," PALACE ROAD,

Bangalore, (S India), dated -October 23, 1932

FROM

J V KARVE, Esq., M.B., Ch B (EDIN), DPH (LOND),

Director of Health with the Government of
His Highness the Maharaja of Mysore,
Bangalore

GENERAL SECRETARY
26 OCT 1932

M. Ranga Rao, Esq., B.A., B.L.,
General Secretary to the Government of
H.H. the Maharaja of Mysore, Bangalore.

SIR, Subject:- Improvement of Mysore Water Supply.

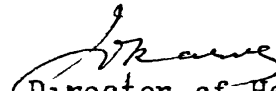

I have the honour to state that in view of the urgent necessity for improving the water supply of Mysore City both as regards quality and quantity, alternative schemes were prepared. One, a complete and bigger scheme costing about Rs. 14,06,888 providing for bringing filter water direct from the Krishnarajasagara dam; the other, costing about Rs. 3,33,000/- providing for improvements to the existing filters, investment on additional pumps, enlargement of the high level reservoir and improvements to the distribution. Both the proposals were sent to the President, Mysore Municipality, for expression of the views of his council, particularly in regard to the financing of the schemes. In view of the present financial stringency consideration of the first scheme was not pressed. Even the cheaper second scheme was modified and split up into three stages in the order of urgency, the first stage costing Rs. 1,01,070/-. The modified proposal was furnished to the President, City Municipality, Mysore early in September. So far, I have had no word from him on the subject. In the meantime the Superintendent, Vani Vilas Water Works is getting into difficulties with the pumps. Just before Dasara the pumps at Belagola threatened to break down but happily owing to prompt attention in time sudden collapse of water supply was averted.

There is no knowing when similar troubles would arise..
may arise any moment and land the city in water difficulty.
It is therefore urgent that the situation has to be met and ~~an~~
scheme estimated to cost Rs. 1,01,070/- immediately worked out.
How this is to be financed I leave it to Government to decide
in due course but pending such decision I would suggest Govern-
ment advancing the money in view of the urgency.

I request the favour of early orders of Government in
the matter.

I have the honour to be
'
' Sir,

Your most obedient servant

Director of Health.

W246-31-21

To

L 4002 D 8/12/32

The President,
City Municipal Council,
Mysore.

Sir,

With reference to correspondence ending with your letter No.G.T.634 dated 21st October 1932 on the subject of the loan asked for from Government for carrying out certain improvement works in the Municipality, I am directed to state that Government consider that of the several items of work^s referred to in your letters, the improvement of the existing arrangements for water supply to the City is the only one which has to be carried out without delay. ~~Therefore~~ They are not however in favour of sanctioning now the aggregate estimate of Rs 3.33 lakhs prepared by the Bureau of Sanitary Engineering^{for the purpose}. The question of financing the second and the third instalments of the estimate presents difficulties and until they are solved these instalments should stand over. The proposal of the Municipal Council that the one-third cost of the total scheme representing the contribution of Government should be paid first for financing the first instalment cannot also be accepted.

Of the six items proposed in the estimate for improving the water supply (vide enclosure to the Sanitary Engineer's letter No.S.E.240 dated 29-8-32^{to the Director of Health}) the last item regarding the installation of one additional pumping set at a cost of Rs 27,100 has already been sanctioned, though the question of provision of funds therefor has not yet been settled. It is understood that the estimate for this item has been reduced by Rs 5,000/- and after making allowance for this reduction, the estimated cost for the six works,

2.

comes to about Rs 96,000/-

Government have at their own cost laid a main to the Railway Workshops and it has cost about half a lakh of rupees. If the works now under consideration and the main referred to are taken together, the cost of the former will represent two-thirds of the outlay to be borne by the Municipal Council, the one-third to be borne by Government having been provided in the form of the main already laid.

The loan of Rs 50,000/- sanctioned in G.O.No.L.1323-4/Ml.71-32-2 dated 19/24-8-32 for tarring roads in the City might be utilized for meeting the municipal share of the cost of the water works referred to, viz., Rs 96,000/- and if the Municipal Council are agreeable to ~~the above~~ ^{the above} proposal, Government will be prepared to give an additional loan of Rs 46,000/- at 6 per cent interest for making up the whole amount required subject to the condition that the whole loan of Rs 96,000/- is discharged in ten annual equated instalments, which should be a first charge on the present revenues of the municipal council and not made to depend on any fresh revenue expected to be realised hereafter. I am to request you to place the matter before the Municipal Council and forward their resolution for the orders of Government.

I am to add that it is not possible to advance any money for the other purposes referred to in your letter dated 22-9-1932.

I have etc.,

General Secretary to Govt.

OFFICE OF THE PRESIDENT,
CITY MUNICIPAL COUNCIL, MYSORE

Dated 31st December 1932

4 JAN 1933

FROM

B T KESAVA IYENGAR, Esq, B.A.,
PRESIDENT, CITY MUNICIPAL COUNCIL,
MYSORE

3010
L.S.G.

To

The Secretary to Government,
General Department,

ml 246-31-10

GENERAL SECRETARY
BANGALORE.
6 JAN 1933
No. 655
SIR, 6/1/33

With reference to your letter No.L.4002/Ml.246-31-9 dated the 9th inst. on the subject of the loan asked for from Government for carrying out certain improvement works in the Municipality, suggesting that the loan of Rs.50,000 sanctioned in Government Order No.L.1326-4/Ml.71-32-2 dated 19/24th August 1932 for tarring roads in the City may be utilised for urgent water supply improvements, I have the honour to state that the total quantity of material required for tarring the roads embodied in the estimate has been indented for placing advance orders with the firm so as to secure the most favourable rate, and more than 3/4th the total supply of tar has already been received and paid for. The tarring of three of the important roads which was pending execution for more than a year and the execution of which was repeatedly being urged during every inspection has been almost completed. More than half the expenditure on the scheme has already been incurred and bills are pending payment, the municipality stands committed to complete the tarring of the roads sanctioned, as the works are all in various stages of progress and as advance orders have been placed for the required quantity of tar. Further if some only of the roads are tarred and others left incomplete, it would give room for needless controversy in the Municipal Council, particularly

with reference to attention bestowed to some road only and not to others which the Council are anxious to push through. Taking all these facts into consideration, I feel that it is both too late and quite inexpedient to divert any portion of the grant meant for tar roads towards the water supply scheme. The water supply to the City as I have already submitted is a most urgent need and cannot also be put off and it is quite necessary that the first stage of the improvements should be carried out without further loss of time. An additional grant of Rs.50,000 cannot therefore be avoided or postponed.

As regards treating the cost of nearly half a lakh of rupees incurred by Government for laying a main to Railway Workshop as representing a portion of the contribution to be borne by Government towards this urgent and important scheme, I beg to invite kind reference to the Council Resolutions Nos.180 dated 6th December 1930 and 388 dated 4th April 1931 forwarded to you in this office letters Nos.G.T.935 and G.T.1982 dated 19th December 1930 and 5th May 1931 respectively and in view of the representation then made, the question of treating the cost incurred on this part of the scheme as part of the contribution payable by Government does not seem to arise.

But whatever this aspect of the case may be, it will be seen that the entire scheme of improving the city water supply will have to be financed by Government partly as a contribution and partly as a loan and in this view the required amount will have to be advanced by Government to the extent possible from year to year, and adjustments to be made between Municipal Funds and State Funds considered separately. In these circumstances and in view of the urgency of the case, I request that you will be so good as obtain early sanction of Government for an additional sum of Rs.50,000 to make the sum of Rs.96,000 which is absolutely necessary for the first and most urgent part of the scheme

I have the honour to be,
Sir,
Your most obedient servant,

M. S. D. N. I.
M. S. D. N. I.

During our conference on the 17th January 1933, I referred to the urgent works necessary at the Vani Vilas Water Works, Mysore and referred to letter No. L. 4002/Ml. 246-31-9 dated 8th December 1932 from the General Secretary to Government to the President, City Municipal Council, Mysore which intimated that Government are prepared to give the Mysore Municipal Council an additional loan of Rs. 46,000/- at six per cent interest providing the loan of Rs. 50,000/- sanctioned by Government for tarring the roads in the City might be utilized for meeting the municipal share of the cost of water works improvements costing Rs. 96,000/-.

I request that Government be pleased to place the Rs. 46,000/- loan immediately at the disposal of the Bureau of Sanitary Engineering in order to carry out the urgent works necessary for continuous satisfactory service of water to the Municipality

The Rs. 46,000/- will enable the Bureau of Sanitary Engineering to carry out two important stages of the estimate for improving the water supply to the City, viz., the installation and housing of one new two million gallons pumping set at the Jewell Filters and one three million

Dewan of
Mysore.

.2.

February 14, 1933

gallons pumping unit at the Belagola Pumping Station. These two units are absolutely necessary in order to guarantee continuous water service to the City daily. With the approach of His Highness the Maharaja's birthday with its accompanying influx of people from the surrounding districts, the water supply problem becomes acute and depends solely upon the performance of pumping units operating 24 hours a day for a number of years. The installation of the two new sets proposed will relieve the strain on the old pumping units and will enable us to supply the City with almost four million gallons per day during the birthday festivities.

Sincerely yours,

J. J. Mieldazis,
SANITARY ENGINEER.

PUBLIC OFFICES, BANGALORE,

Dated 16th February 1933

Dear Mr. Mieldazis,

With reference to your letter No.728 dated 14th --
February 1933 to the Dewan of Mysore, regarding the loan
of a sum of Rs 46,000/- to the Mysore Municipal Council I am
directed to enclose herewith a copy of a letter sent by
Government to the Municipal Council. As you will see there-
from, permission has been given for placing an order for the
machinery in anticipation of sanction of the loan of Rs 46,000/-
to the Municipality. You may kindly do the needful in the
matter.

I am to state that it has come to the notice of
Government that one of the machines which is being used in
the Bangalore Y. Tank will be soon set free and will be
available for use at Mysore. The Chief Engineer and the
Director of Health have been requested to look into the
matter. Should the use of this machine be possible at Mysore,
Government presume that the whole sum of Rs 46,000/- will not
be required.

Yours sincerely,

1933

Dear Sir,

ml 246-31-12

10 MAR 1933

Resd

With reference to your No. L. 5466/Ml. 246-31 dated 16th February 1933 regarding the possible use at Mysore of pumping units to be relieved from service at Y tank, I wish to advise that the Y tank motor is 2200 volts while the voltage available at Belagola is 4400 volts. Hence the motor cannot be made use of there. Moreover the pump capacity of the Y tank pumping unit is only one million gallons per day against a head of 500 ft. whereas at Belagola the head is not more than 400 ft. even for a discharge of $2\frac{1}{2}$ million gallons per day.

As for the use of the Y tank pumping unit at the Jewel Filters, Mysore we require only a low lift pump with much greater capacity i.e. two million gallons per day against 140 ft. head. Hence the 170 horse power unit available at Y tank is too big in horse power and pumping head but too small in capacity for use at the Jewel Filters.

Under these circumstances, the whole amount of Rs. 46,000/- will be required for the immediate improvement at Mysore.

Sincerely yours,

J J Mieldazis,
SANITARY ENGINEER.

The General Secretary to
the Government of Mysore,
BANGALORE.

To

The Chief Engineer of Mysore,

B a n g a l o r e.

SIR,

SUBJECT:- Pumping Set of Yelomallappa Chetty
Tank being spared for Mysore Water Supply

With reference to your letter No.9075 dated 4th
March 1933 in the above matter, I have the honour to state
that this pump with its motor will not fit into the Mysore
Installation.

The Y Tank Motor is of 2,200 volts but the voltage
available in Belagola is 4,400. The pump capacity at the
Y Tank is only 1 million gallons per day against a head of
500 feet, whereas the head at Belagola is not more than
400 feet even for discharge of 2½ million gallons per day.

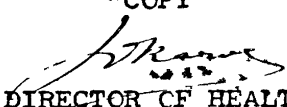

The Pumping Unit cannot be used at the Jewell
Filters either, for here ~~we require~~ only a low lift pump
with 2 million gallons capacity per day against a head of
140 feet, ^{is required} The 170 H.P. Unit of the Y Tank is too big in
horse power and head but too small in the capacity.

In the above circumstances, the Y Tank Unit will
not suit either at Belagola or at Mysore.

I have the honour to be,
Sir,
Your most obedient servant,
Sd/- J. V. Karve,

Director of Health.

17 MAR 1933
L. G. BRANCH.

To

The General Secretary to the Government of

His Highness the Maharaja of Mysore,

BANGALORE.

SIR,

Adverting to correspondence ending with your letter No.L.
5459/11.246-31-12, dated the 15th February 1933 intimating that
Government is prepared to grant a loan of Rs.46,000 towards the
water supply improvements etc., I have the honour to state that
the cost of laying the main to the Railway workshop has not been
included in the estimate for Rs.3.30 lakhs, the abstract of which
has been forwarded to you in this office letter No.G.F.503, dated
26-9-1932. If the cost of laying this main is to be treated as
a portion of Government share of contribution towards the whole
water supply improvement, then the 1/3rd share of Government con-
tribution will be Rs.1.27 lakhs for a total estimated cost of
Rs.3.30 lakhs plus Rs.50,000 (already spent for the main to
railway workshop) or of 3.80 lakhs.

Government requested in this office letter No G.F.503
dated 26-9-1932 that 1/3rd the cost of the scheme, viz, 1 1
lakhs may be advanced by Government as their full share of con-
tribution towards the whole scheme in the first instance, the
balance being advanced as loan to the Municipality in instalments
of not less than Rs.50,000 per year. Even taking Rs.50,000

already spent as a portion of Government share of contribution as
per your letter No.L.4002/11.246-31-9, dated 8th December 1932,

there still remains a balance of Rs.77 lakh to be paid by Government to complete their share of contribution for the whole scheme. The laying of the line to the Railway Workshop has not been of any benefit to the Municipality as the income derived therefrom is not more than Rs.3,600 a year, barely sufficient to meet even the proportionate maintenance charges for the supply to that area. In view of the fact that the Railway Workshop area is outside municipal limits, and the municipality is not deriving any income from house tax, general water rate etc., the loan obligation on account of Rs.50,000/- spent for laying the main becomes a very heavy burden to the Municipality. It seems reasonable therefore to exclude this amount from the loan obligations of the Municipality till such time as the whole area comes under municipal limits. Till then either the maintenance charges borne by the Municipality should be reduced proportionately or Rs.3,600/- set off against such charges.

V It was represented in No.G.F.1009 dated 4-1-1933 that the whole amount of Rs.96,000 prayed for may not be treated as a loan but that only a sum of Rs.50,000 may be treated as loan to be liquidated in ten equated instalments of Rs.7,000 a year, the balance of Rs.46,000 being advanced to Municipality as a portion of the Government share of contribution towards the scheme. Taking into consideration the fact that the Municipal Council have already heavy debt obligations to discharge, I request that the matter may be kindly reconsidered and the request of the Municipality sanctioned. I further beg to add that the present grant of Rs.46,000/- does not go very far to improve the pumping units, motors and filters and unless this first stage of the scheme is fully worked out, it will not be possible for the Municipality to take up the question of improving the distribution system on which alone will depend the question of increasing the number of house connections for which there is a great and persistent demand.

As regards the repayment of the loan of Rs.50,000 there

will be no difficulty in arranging for the repayments as the income derived from extra house connections from the year 1931-32 will be earmarked for the purpose. In view of nearly 248 house connections given during 1931-32 with the present limited supply of water, it is anticipated on the basis of the number of applications that are being received, that not less than four to five hundred extra connections could be safely given with the proposed improvement of pumping units.

In these circumstances and in view of the seriousness of the situation as already brought to notice, I request that you will be so good as to submit the proposal to Government again and obtain their sanction for a total sum of Rs.96,000, Rs.46,000 being treated as a portion of their contribution, the balance of Rs.50,000 being treated as a loan to be liquidated in ten equated instalments.

As regards finances required for other urgent works to be taken up, there is a proposal to float a loan of about Rs.5 lakhs either in the open market or from the Bank of Mysore on favourable terms and detailed proposals will be submitted after fully examining the matter in the Municipal Council.

I note that the grant of Rs.46,000 by Government as a loan may be anticipated and arrangements may be made to purchase the necessary machines. This will be done pending consideration of the representation submitted above.

I have the honour to be,

Sir,

Your most obedient servant,

President.
even

1. The scheme for the improvement of the City water supply costing Rs.3.3 lakhs be taken up immediately, the entire amount being financed by Government, subject to the determination of the Municipal contribution with reference to their present financial position and with reference to their quota of contribution reasonably payable towards the maintenance charges of the Vani Vilas Water Works.

1) Originally two schemes costing 4.07 and 2.65 lakhs for the improvement of the City water supply were prepared, the former being a full dressed scheme, the latter being a less costly one providing therein the use of the released Jewell Filters from the Bangalore City ~~Water~~ Water Supply. The former was considered to be very costly and the latter scheme was not accepted as the Municipal Council were not in favour of using the old Jewell Filters to be released from the Bangalore City Water Supply. Thereupon, the Bureau of Sanitary Engineering prepared a scheme for Rs.3.30 lakhs providing therein the most urgent and minimum requirements and dividing the whole scheme into three stages for facility of working the scheme by instalments, Vide details furnished in my Note G.T.503 dated 26-9-1932.

As regards the entire amount required for working out the full scheme, I beg to submit that I have suggested in my notes dated 26-9-1932 and 12-5-1933 that sanction may kindly be accorded to the whole scheme and that a sum of Rs.1.5 lakhs might be advanced by Government in the 1st instance for taking up immediately the most urgent stages of the schemes Viz., improvements to Head Works costing Rs.1.01 lakhs and Rs.50,000 for improvement to

B T. KESAVA IYENGAR, ESQ , B A
PRESIDENT

D O N o G T 1977

CITY MUNICIPAL COUNCIL, MYSORE

Dated 10th June 1933

Dear Mr. Subba Rao,

I enclose herein short notes on the
points for discussion tomorrow morning
on the question of the City water supply.

Yours sincerely,

M. S. Subba Rao

Sub
1976

K. Subba Rao, Esq., B.A.,

Private Secretary to the Dewan
of Mysore,

Camp Mysore.

GVX

distribution system.

Government while according sanction to the 1st stage of the improvement, observed that the amount of Rs.50,000 invested by them already for laying a sub-main to Railway Work Shop may be considered as portion of their contribution and that the balance of Rs.46,000/- would be granted as loan to the Municipality to carry out the 1st stage of the improvement. Thereupon it was pointed out to Government that the cost of laying the sub-main to Railway Workshop had not been included in the scheme for Rs.3.3 lakhs and that if the cost of Rs.50,000 is also included, the portion of Government share of contribution would also increase proportionately. Besides, it was also represented that as the Railway workshop is not included in the Municipal limits the amount realised as water revenue in that area not being appreciable, may not be given to the Municipality, and that the question of treating this portion of the expenditure as a portion of Government share of contribution towards the water supply improvement scheme may kindly be considered after the locality is included within Municipal limits which question has to be taken up for consideration sooner or later. In accordance with Government Order of 1927, all capital works have to be carried out by Government at their cost and on this basis, the amount spent by the Municipality on original works such as laying sub-mains, to the several localities in the City for the past four or five years (a statement of which is being prepared) will have to be adjusted towards the share of contribution due from the Municipality.

In view of the Vani Vilas water works being

a free gift to the Municipality and in consideration of their slender resources and the heavy loan obligations that they have on hand it is suggested that the entire amount may be financed by Government, subject to the revision of the question of the levy of the Municipal Contribution with reference to their financial position on a more equitable basis than at present towards the maintenance charges of the Vani Vilas Water Works; or in the alternative to extend the period of repayment from 10 to 20 years ~~after consolidating all loans and reducing the~~ percentage of interest on the total amount -- representing the amounts already drawn and to be hereafter advanced by Government, towards the quota of contribution due by the Municipality.

2. The proportion of 2 to 1 on account of water supply maintenance charges between the Municipality and Government fixed in Government Order No.L.4285-8/Ml.84-26-6 dated 4/7th January 1927 be revised so as to be in keeping with the actual consumption of water by the two bodies.

The proportion of 2 to 1 on account of water supply maintenance charges between the Municipality and Government was fixed in the year 1927 subject to modifications if circumstances permit. The maintenance charges which amounted 1.2 lakhs in the year 1927 has risen to 1.6 lakhs (subject to slight corrections in figures) in recent years owing to formation and laying out of additional parks and gardens. The proportionate increase in expenditure in so short a time tells heavily upon the limited resources of the Municipal finances, and the hardship of the rate-payers in regard to regular and adequate water supply, however, still remains unabated.

The total quantity of water that is being distributed in the City per day roughly amounts to 3½ million gallons. Out of this, a quantity almost equivalent to 1.2 million gallons represents the consumption by Parks and Gardens, as observed recently, when one of the pumping units broke down and water entirely cut off to these gardens. If to this, is added the daily supply to the Government buildings and the Palace, the net quantity that goes to the share of the rate-payer is ascertained to be approximately 1.7 millions gallons. On this data, it is urged that Government may reconsider the question of proportion and revise the liability so as to make the distribution of charges equal. For considerations urged by the President recently

18
11/11/27

11/11/27

in his unofficial Note to Government submitted with his No. 671799 dated 12-5-1933 with regard to Mysore City as it is situated, the deputation strongly urges that this question may be -- sympathetically considered and the proportion altered as prayed for.

7
3. The one-third cost of maintenance now being paid by Government is only in consideration of the quantity of water consumed in Government and Palace buildings and gardens, and is not in the shape of a contribution to the Municipality. As the whole of the maintenance charges thus devolves on the Municipality, the control of the Water Supply Department may be transferred to the Municipality.

The Municipality has a real grievance on this question of proportion as already indicated with reference to item (2) supra. The question of transfer of the control of the Water Supply Department to the Municipality is being urged by the Council in view of the complaints by the rate-payers regarding the unsatisfactory nature of the distribution of the supply. The point is ^{in fact} that generally (though not particularly now) co-ordination between the Water Supply Department and the Municipality that is required for the satisfactory working of the distribution system is lacking. The department ^{it is alleged} does not keep the Council informed of the details of its doings and ~~all on a sudden~~ allows fluctuations in the supply of water, occasionally without the knowledge of the Council or the rate-payers. The Council is called upon to pay the maintenance charges regularly but kept in the dark about the details of such charges. This is strongly resented. Two courses seem open to meet this point. Firstly to instruct the water supply Department to allow the local officer viz., the Superintendent to be virtually an officer of the Municipality taking direct orders from the President whereby he will know the exact requirements of the Municipality ^{of} which he may acquaint his superiors in the Department and

7
7

thus get the grievances or shortcomings reredied as early as convenient. He will be a sort of a liaison officer between the Municipality and the Government Department or 2ndly the whole staff including the Engineer Officer to be entirely transferred to the Municipality to work under the orders of the Council in direct subordination to the President. But in this case the officer concerned will for all practical purposes be doing things independently so far as the departmental technique is concerned, and will not have the advantage of higher professional supervision as frequently as when he is under the Department.

4. The existing loans may all be consolidated, a low rate of interest charged and the period of repayment extended to a longer duration so that it may be possible for the Municipality to repay the amount without stinting expenditure on public requirements.

The total amount of loan sanctioned for tarring several important roads in the City is Rs.2½ lakhs. When the question of tarring roads in the City ^{Came} ~~came~~ for discussion, the Municipal Council were of opinion that the improvement to the Mysore City Water Supply was more urgent and pressing than the tarring of roads. But as the latter schemes however took shape and were sanctioned earlier in the interest of the aesthetic improvements of the City, they hoped that the scheme for the improvement of the City Water Supply would accordingly be favourably considered at no distant date. Now that the tarring scheme as sanctioned is practically over there is no use of further discussion in the matter.

The only practical solution to get over the difficulty and to improve the water supply distribution system is to consolidate all the existing loans and to ease the period of re-payment from ten to twenty years. Even supposing the life of tarred roads is about 10 years a fresh loan to the extent necessary to re-tar the surfaces will have to be floated and this procedure will have to be continued until all the loans are liquidated. A further sum of Rs.1 lakh will also be necessary to tar the remaining other important roads and if this amount is spent by taking an additional loan, there will be a perceptible savings in the item "annual repairs to retalled roads" and the savings thus effected can

with advantage be ear-marked towards the liquidation of this loan. This proposal has been fully explained in my un-official Note submitted to Government in No. 671799 dated 12-5-1933.

5. A committee consisting of officials and non-officials be appointed to examine the above points and formulate proposals thereon.

In consideration of the hardship caused to rate-payers and the subject being in correspondence for nearly three years, the Municipal Council feel the necessity of disposing of the scheme finally in the best manner possible without any further delay and have suggested a committee being formed comprising of officials and non-officials to examine the aforesaid points. This is a matter for the Government to decide as they deem fit.

M. S. S. S. —

The President,

City Municipal Council,

MYSORE.

Dear Sir,

We are anxious to wait upon the Dewan in deputation to represent the present unsatisfactory state of water supply to the City, and the urgent necessity for the grant of a loan for its improvement.

We wish also to represent that in view of the present financial circumstances, it is not possible to repay our existing loans before the expiry of the period fixed, without starving works of public utility and convenience. It is therefore necessary to extend the periods of the existing loans to a longer term so that repayments may be made in easier instalments, interest on the loans being also reduced in accordance with the prevailing market rate.

We request you to be so good as to arrange for the deputation very early and intimate the fact to us.

Thanking you,

We remain,

Yours faithfully,

Order thereon—No. L 112-15-9-6/7/33

The municipal
Council have submitted for the
Sanction of Govt. a scheme for
the improvement of water supply
in the Mysore city estimated to
cost Rs 3.3 lakhs and requested
administrative sanction to the scheme.
The proposal is to work out the

1/17/9

h-1-p

scheme in three stages ^{the first} ~~the first~~
improvement of the pumping unit
and increasing the number of
filters ^{about Rs. 11 lacs being taken}
~~costing~~ ^(immediate)
up in the first instance -

2) The question of the ^{relative} urgency
of the several parts of the scheme
and the ways and means for
financing the ^{work} that are the
most urgent ^{was} discussed ^{by} a
deputation of the President and
municipal councillors with the
Deewan at Aligarh on the 11th June last.

In accordance with the conclusions ~~then~~
arrived at, ^{as the result of this discussion} Government are pleased
to sanction the following items
in the improvement scheme
which are considered to be ^{the} most
urgent

- a) Improvement of the pumping unit
and filters comprising
- (i) Extension of Jewel filter building Rs. 4780

- (ii) Installing one new 2 m²
pumping unit at Jewel filters Rs. 1,00,000

List of Enclosure

Copied by

Examined by

GENERAL AND REVENUE
SECRETARIAT

(Continuation sheet draft form)

- (iii) Installing two units of new type filters of 0.5 mlg. ^{Rs} 18,000 Capacity each with pipe connection
- (iv) Three shed for accommodating three new units of new type filters behind the existing filter building ^{Rs} 7,09
- (v) Pipe connections from settling tanks to the new type filters to flume and to low level Reservoir ^{Rs} 26,100
